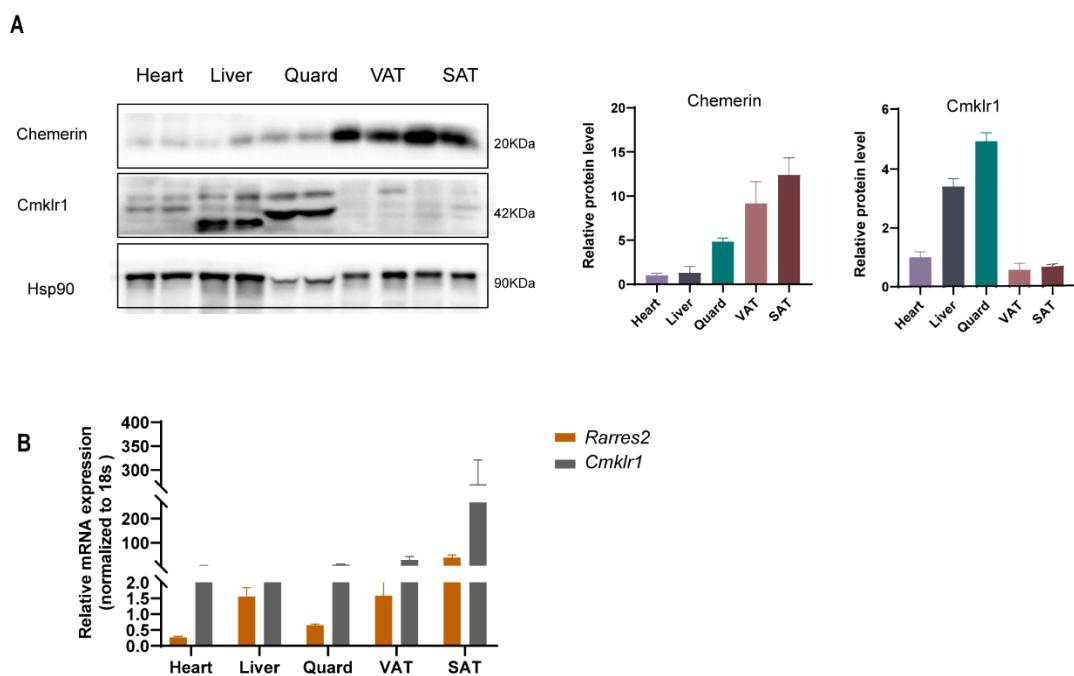

Figure S1. The expression of chemerin and its receptor in various organs of mice under high-fat feeding, Related to Figure 1

Chemerin and *Cmklr1* expression was detected in different tissues in WT mice under HFD 20

weeks (**A**) Western blots and its quantification of Chemerin, Cmklr1 in the heart, liver, skeletal muscle, and adipose tissue lysates. The HSP90 was used as a loading control (n=3). (**B**) mRNA level of chemerin (*Rarres2*) and *CMKLR1* were detected by RT-qPCR in HFD WT mice.
