

Supplemental Material 1: 12-month vaccine site questionnaire

Vaccine site reaction

We would love to see a picture of your vaccination site, even if it is not visible anymore. How to take the best picture:

- Attach a standard-sized object to your upper arm (e.g. coin or measuring tape or ruler) using rolled up sticky tape or BluTack, adjacent to the vaccination site.
 - Hold your phone approx. 15cm away from the area being photographed.
 - Ensure the entire injection site and coin are in the photo and in focus.
-

Please upload your photo (vaccine site) here.

Do you have a scar (or bump or mark) at your BRACE vaccination site?

(Please answer 'no' if there is nothing to see)

- Yes
 - No
-

Which of the following best describes the vaccination site today?

(Please do not hesitate to contact us via email or phone if you are concerned.)

- Skin colour mark without redness (normal scar formation)
 - Red mark
 - Red mark with discharge
 - Red mark with crusting
 - Ulcer (open sore)
 - Vaccination site still looks 'angry' with swelling and/or redness all around it
 - An abnormal thick scar
 - Other
-

If other, please describe:

The scar (or bump or mark) is:

- Palpable only, not visible
 - Visible only, not palpable
 - Visible and palpable
 - Visible and palpable with crust
-

What do you think about your scar?

- I don't mind having the scar at all
 - I would rather not have a scar, but understand this is unavoidable
 - I'm dissatisfied with the scar
-

Why are you dissatisfied with your scar?

- I didn't expect to have a scar
 - It is worse than I expected
 - Other
-

If other, please describe:

Do you regret having the vaccine because of the scar?

- No, I don't regret having the vaccine
- Yes, I regret having the vaccine
