

Evaluation of the ABIDE feasibility tool – Test tasks

While working on the test task, please think aloud and say at any time:

- What would you do now?
- How would you proceed with this?
- What works well in the process /What do you like about the ABIDE Feasibility Tool?
- What is problematic for you in this process and why?

Test task 1

Task 1a) Please determine the **number of those patients** who have the following characteristics:
