

Supplemental Figure 5

Similar distribution of mTICI scores across subgroups. The proportion of final mTICI scores was similar across subgroups of age, occluded vessel, the NIHSS score upon admission, the onset-to-puncture time, and the ASPECTS. The shades of the color blue indicate mTICI scores 0-2a (light blue), 2b (medium blue), and 3 (dark blue). mTICI, modified Thrombolysis in Cerebral Infarction; M1/2, first/second segment of the middle cerebral artery; NIHSS, National Institutes of Health Stroke Scale; ASPECTS, Alberta Stroke Program Early CT Score; ICA, internal carotid artery.
