

S1 Fig. Elemental analysis results of isolated streptothricin F from commercially available nourseothricin sulfate. The percent compositions align with a molecular formula of $C_{19}H_{34}N_8O_8 \cdot \frac{3}{2} H_2SO_4 \cdot 3 H_2O$.

C	H	N	O
32.47 %	6.48 %	14.01 %	36.68 %
S			
7.12 %
