

S2 Fig. Elemental analysis results of isolated streptothricin D from commercially available nourseothricin sulfate. The percent compositions align with a molecular formula of $C_{31}H_{58}N_{12}O_{10} \cdot 5/2 H_2SO_4 \cdot 5 H_2O$.

C	H	N	O
31.41 %	5.49 %	15.00 %	35.78 %
S			
7.06 %
