Fig. S3 Analysis of vimentin via western blot analyses. This figure is related to **Fig. 4. a** Three different passages were used to evaluate the content of vimentin in SMC and ALI (passages 115, 116 and 117). We found a higher content of vimentin (54 kDa) in SMC compared to ALI. **aa** β -actin was used as loading control (42 kDa).
