

**Table S2**

Breakdown of patients with secondary diagnoses (n=60; 90.8%) and operations on the study eye (n=46; 70.8%)

<b>Secondary diagnoses (N=60)</b>	<b>N (%)</b>
Cataract	14 (21,5%)
Pseudophakia	41 (63,1%)
Glaucoma	14 (21,5%)
Primary open-angle glaucoma	4 (6,2%)
Other glaucoma	10 (15,4%)
Retinal artery occlusion	1 (1,5%)
Corneal diseases	1 (1,5%)
Uveitis	2 (3,1%)
Eyelid disease	5 (7,7%)
<b>Eye surgery (N=57)</b>	<b>N (%)</b>
Cataract surgery	41 (71,9%)
Laser surgery (ALC <sup>a</sup> , YAG <sup>b</sup> laser iridotomy, YAG laser capsulotomy)	8 (14%)
Minimally invasive glaucoma surgery (iStent, trabectome, canaloplasty ab interno)	1 (1,8%)
Vitrectomy	2 (3,5%)
Eyelid surgery	2 (3,5%)

<sup>a</sup>ALC, argon-laser-coagulation; <sup>b</sup>YAG, yttrium-aluminum-garnet
