

Table S6

Sensitivity analyses for secondary switch (inverse group, n=37)

Switch distance		
Distance between last A^a/R^b and first B^c [in days]	79.5± 5.8	
Drug exposure		
	Before switch	After switch
Therapy time [in years]	3.2± 0.4	1.0± 0.1
Number of IVT-injections	16.5± 2.0	8.7± 0.7
Interval between the last two recorded IVT-injections [in days]	42.8± 5.1	44.2± 3.3
Assigned finding distances		
	Before switch	After switch
IVT-injection to BCVA distance [in days]	38.0± 2.9	39.1± 3.4
IVT-injection to OCT distance [in days]	38.4± 2.8	37.1± 2.8

A^a = aflibercept; B^b = ranibizumab; C^c = bevacizumab
