<i>In the case of a patient who is aged 18 years or over:</i>		
Do you screen patients with CAH for abnormal glucose homeostasis?	Yes/No	Yes/No
What methods do you use to screen for abnormal glucose homestasis and how often?	Random plasma glucose Fasting plasma glucose Fasting plasma insulin HOMA index Insulin Resistance Index (IRI) 2 h blood glucose (OGTT) Hb1Ac Other (please specify)	Select all responses that apply and specify how often the method is used in free text
Do you screen patients with CAH for hyperlipidaemia?	Yes/No	Yes/No
What methods do you use to screen for hyperlipidaemia and how often?	Fasting total cholesterol Fasting LDL cholesterol Fasting HDL cholesterol Fasting triglycerides Other (please specify)	Select all responses that apply and specify how often the method is used in free text
Do you screen patients with CAH for hypertension?	Yes/No	Yes/No
What methods do you use to screen for hypertension and how often?	Systolic and diastolic BP 24 h BP measurement Nocturnal BP measurement Other (please specify)	Select all responses that apply and specify how often the method is used in free text

Do you screen patients with CAH for cardiovascular disease?	Yes/No	Yes/No
What methods do you use to screen for cardiovascular disease and how often?	Stress test Cardiac USS Cardiac MRI Other (please specify)	Select all responses that apply and specify how often the method is used in free text
Do you screen patients with CAH for obesity?	Yes/No	Yes/No
What methods do you use to screen for obesity and how often?	Weight BMI Waist circumference Hip circumference Other (please specify)	Select all responses that apply and specify how often the method is used in free text
Do you screen patients with CAH for osteoporosis?	Yes/No	Yes/No
What methods do you use to screen for osteoporosis and how often?	Dual X-ray absorptiometry (DEXA) Other (please specify)	Select all responses that apply and specify how often the method is used in free text

CAH: Congenital Adrenal Hyperplasia; HOMA: Homeostasis Model Assessment of insulin resistance; OGTT: oral glucose tolerance test; LDL: low density lipoprotein; HDL: high density lipoprotein; BP: blood pressure; USS: ultrasound scan; MRI: magnetic resonance imaging; BMI: body mass index; I-CAH: international congenital adrenal hyperplasia registry
