

Circadian disruption and colorectal cancer incidence in Black women

Lauren E. Barber, Trang VoPham, Laura F. White, Hemant K. Roy, Julie R. Palmer,
Kimberly A. Bertrand

Supplemental Table S2. Age-standardized characteristics of the night shift work analytic sample at the start of study follow-up in 2005 according to categories of night shift work.

	Never (n=19,674)	Ever (n=14,747)
Age	48.6 (10.6)	49.1 (10.3)
Body mass index, kg/m ²	29.6 (6.8)	31.0 (7.3)
Years of education: ≤12 years %	12	16
Family history of colorectal cancer, %	10	11
Smoking status: Current, %	9	13
Alcohol consumption: Current, ≥7 drinks/week, %	4	4
Vigorous exercise: ≥5 hours/week, %	7	6
Red meat consumption: Highest quartile, %	23	25
Processed meat consumption: Highest quartile, %	23	25
Total fiber intake: Highest quartile, %	20	18
Geographic region		
Northeast, %	25	22
South, %	35	35
Midwest, %	21	23
West, %	17	18
Sleep duration (ascertained in 2009): ≤6 hours, %	40	45

Values are means (SD) or percentages and are standardized to the age distribution of the study population.
