Glossary

N	total number of mice entering experiment
Nx	number of additional mice excluded from analysis
Na	number of mice in analysis
Nev	number of events

KM med

EFS T-C

EFS T/C

Kaplan-Meier estimate of median time-to-event (days)

Event free survival differences in days between the treated (**T**) and the control (**C**)

Fold differences of event free survival between the treated (T) and the control (C)
