

Supplementary Figure S7

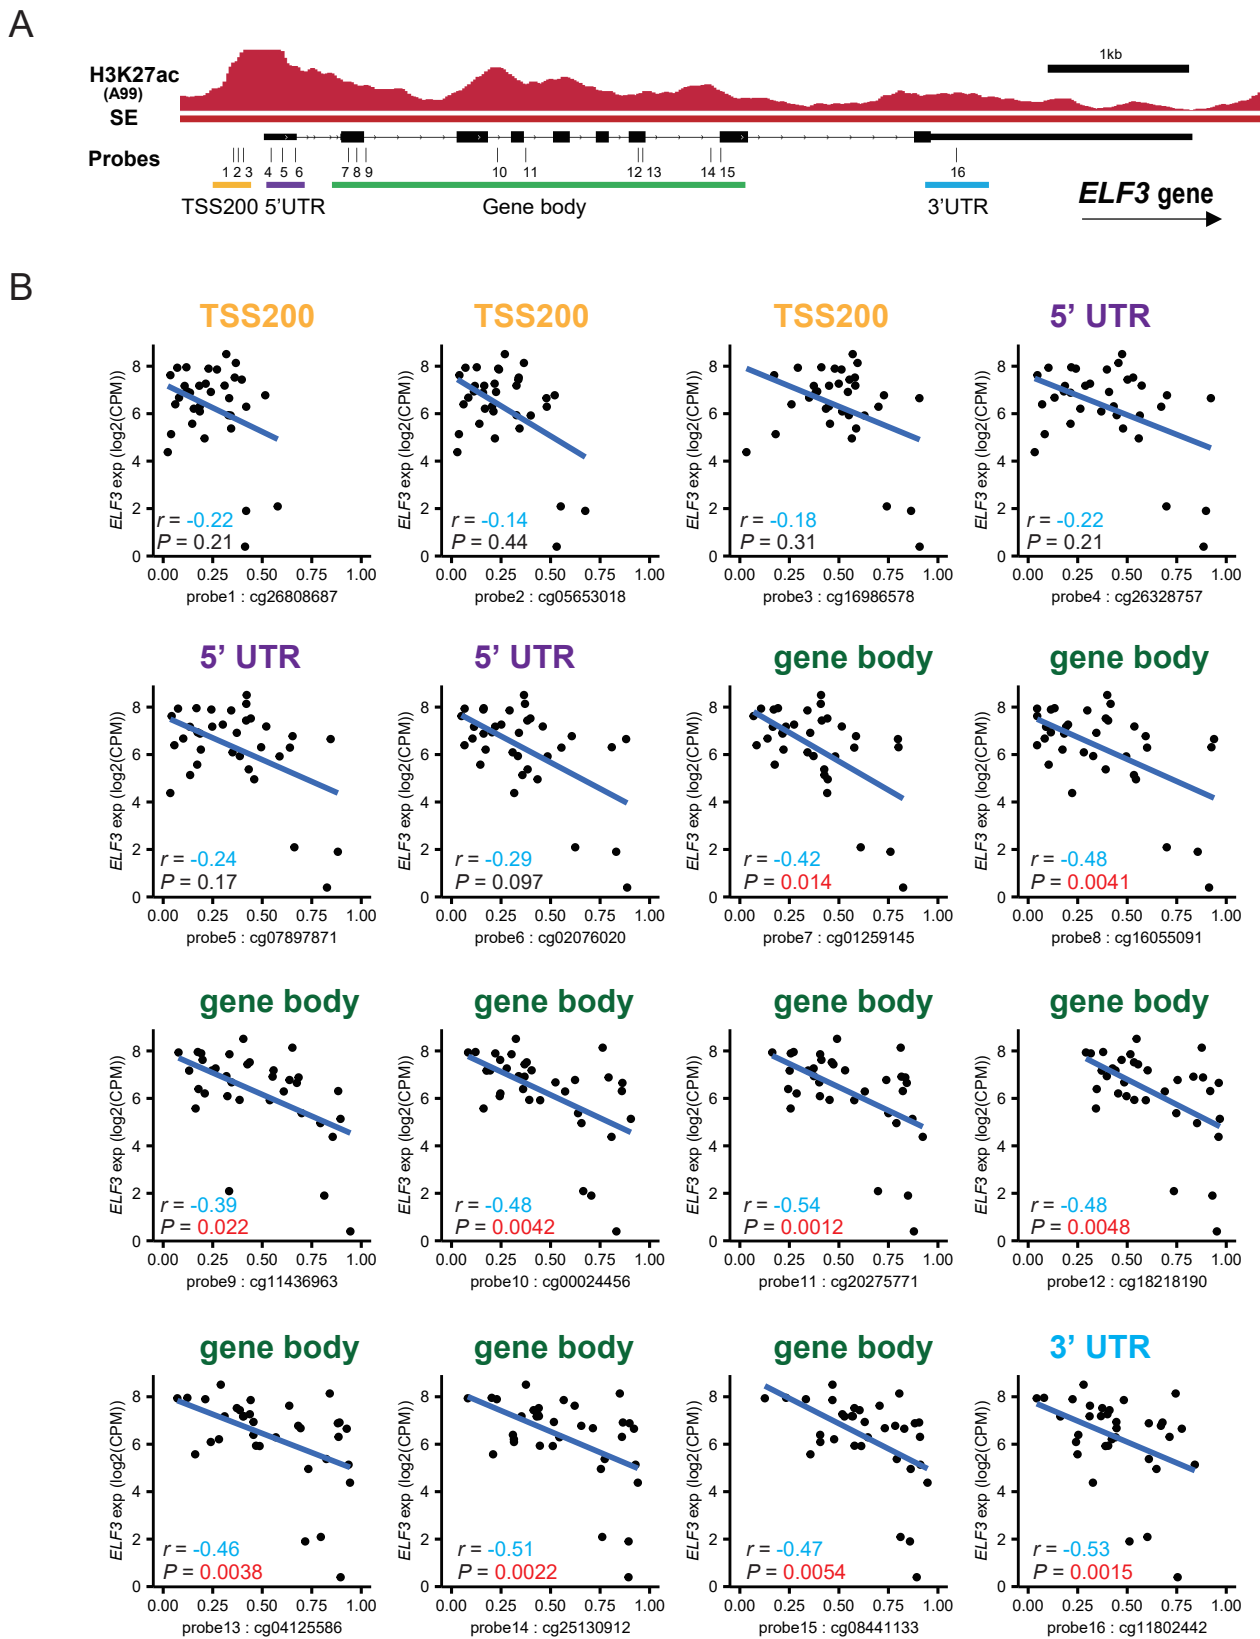

Figure S7. Correlations between DNA methylation and gene expression of *ELF3* in GIS-NEC.

A. H3K27ac signals, super-enhancer regions, and positions of 16 probes of the Infinium MethylationEPIC BeadChip around the *ELF3* gene locus. B. Dot plots showing correlations between DNA methylation of the *ELF3* gene locus and *ELF3* expression. The X-axis indicates β -values of each probe, and the Y-axis indicates the gene expression of *ELF3* based on RNA-seq in 34 GIS-NEC samples.
