

Supplementary Fig 1. MMRi62 downregulates wild-type p53 in Capan2 cells. WB analysis p53 showing that MMRi62 downregulates wt-p53 expression in Capan2 cells. Cells were treated with 2.5, 5, 10 μM MMRi62 for 24, 48 and 72h followed by WB with p53 (D0-1 antibody). HSC70 served as a loading control. Relative levels of p53 normalized against HSC70 were indicated at the bottom.
