

Fig. S11

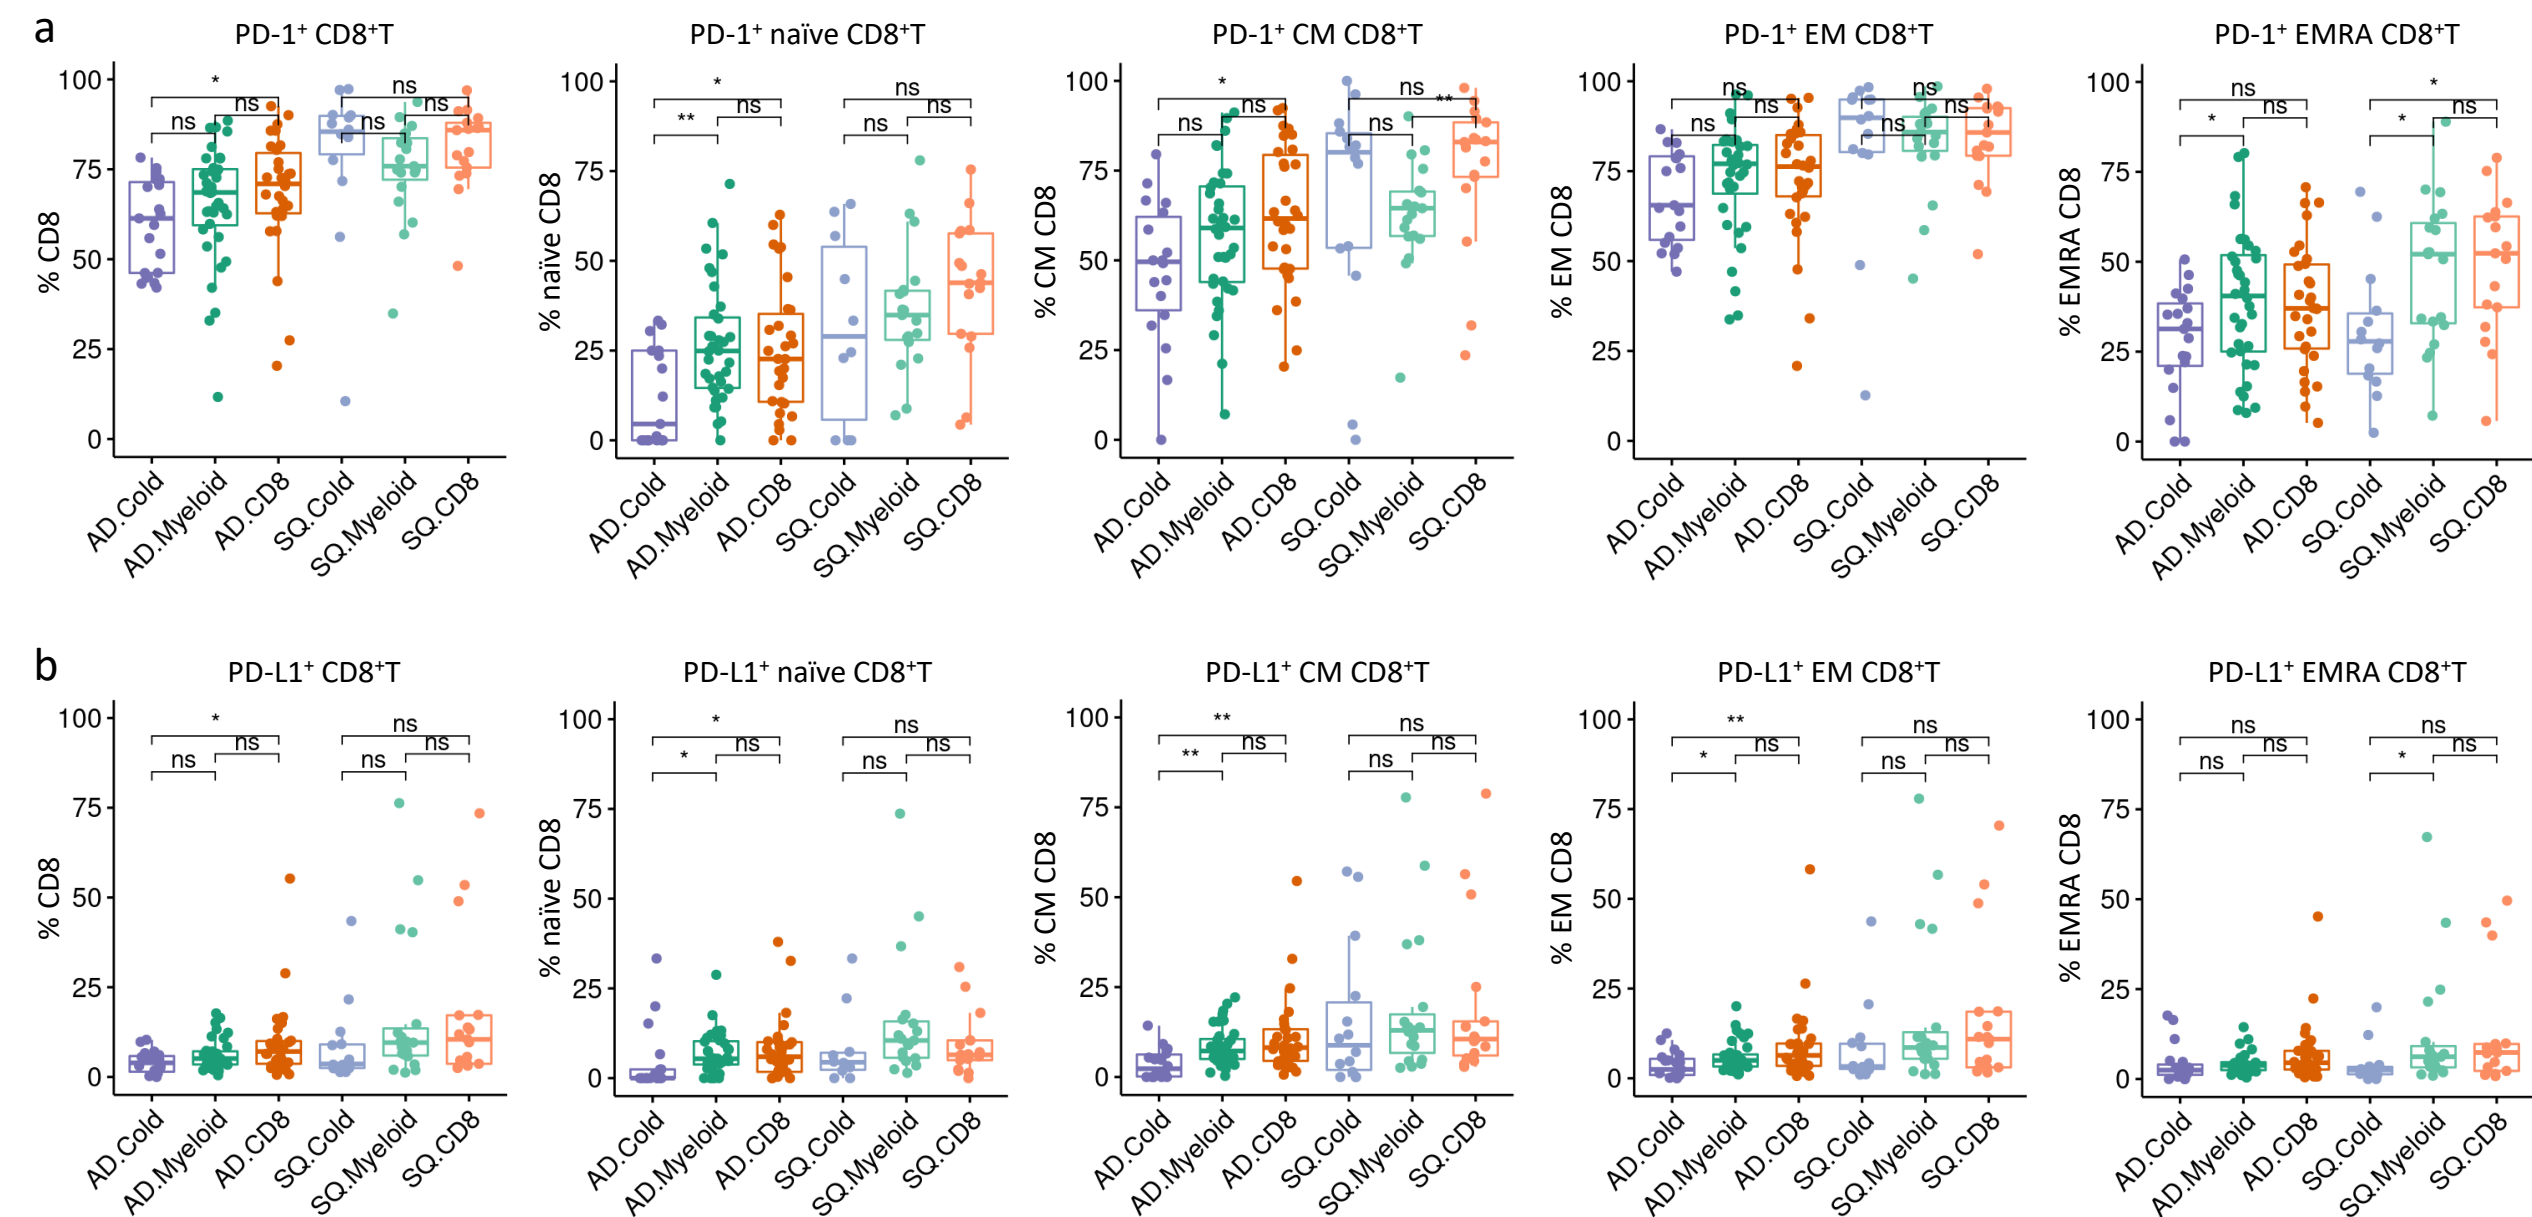

Figure S11. Percentage of PD-1⁺ CD8⁺ T⁺ and PD-L1⁺ CD8⁺ T⁺ cells in respective immune subtypes. (a, b) Data were presented as a percentage of PD-1⁺ cells (a) and PD-L1⁺ cells (b) per indicated CD8⁺ T cell subset in LUAD and LUSQ. % naïve CD8; percentage of PD-1⁺ or PD-L1⁺ naïve CD8⁺ T cell subset per total of naïve CD8⁺ T cells. % CM CD8; percentage of PD-1⁺ or PD-L1⁺ CM CD8⁺ T cell subset per total of CM CD8⁺ T cells. % EM CD8; percentage of PD-1⁺ or PD-L1⁺ EM CD8⁺ T cell subset per total of EM CD8⁺ T cells. % EMRA CD8; percentage of PD-1⁺ or PD-L1⁺ EMRA CD8⁺ T cell subset per total of EMRA CD8⁺ T cells. ns; not significant. * p<0.05. **P<0.01.
