**Supplemental Figure 7: Post hoc analysis using Tukey's test to isolate the effect of exam section, cognitive level and difficulty index using the BCSC questions for ChatGPT Plus.** **(A)** Bar plot of the percentage of accuracy by exam section. There were no differences in performance across the exam sections. **(B)** Predicted percentage of accuracy by difficulty index. Accuracy increased with increasing difficulty index (easier questions). **(C)** Predicted percentage of accuracy comparing Low and High cognitive levels. Higher accuracy was associated to Low cognitive level questions.
