

Supplemental Table 1. List of covariates considered in the multivariable models for pediatric heart

Covariate	1-year mortality model	5-year mortality model conditional on survival to 1 year	5-year CAV model conditional on survival to discharge
Recipient age (years)	x	x	x
Recipient sex	x	x	x
Recipient diagnosis	x	x	x
Recipient history cancer	x	x	
Recipient IV inotropes	x	x	x
Recipient ventilator	x	x	x
Recipient MCS type	x		
Recipient hospitalized	x	x	x
Recipient previous cardiac surgery	x	x	x
Recipient PRA (%)	x	x	x
Recipient GFR (mL/min/1.73 m ²)	x	x	x
Recipient total bilirubin (mg/dl)	x	x	x
Donor age (years)	x	x	
Donor cause of death	x	x	x
Transplant era	x	x	x
Donor CMV+/recipient CMV-	x	x	x
Ischemic time (hours)	x	x	x
Pediatric center volume in previous 3 years	x	x	x
Interaction of era and recipient age	x	x	
Interaction of era and recipient diagnosis	x	x	
Interaction of era and recipient MCS type	x		
Interaction of era and recipient GFR	x
