

Data Sharing Statement

Tveit. Automated Interpretation of Clinical Electroencephalograms Using Artificial Intelligence. *JAMA Neurol.* Published June 20, 2023. doi:10.1001/jamaneurol.2023.1645

Data

Data available: Yes

Data types: Deidentified participant data

How to access data: Individual clinical trial participant-level data (IPD) will be shared upon request. For the multi-center test dataset, the anonymized EEG, diagnostic gold standard, demographics (age, gender), output of the algorithm will be available upon request. As the dataset is de-identified, there is no need for consent from the participants. Data will be available upon request, for 10 years from the publication, for scientific non-commercial use.

When available: With publication

Supporting Documents

Document types: Statistical/analytic code

How to access documents: Python codes - see appendix.

When available: With publication

Additional Information

Who can access the data: Data will be available upon request, for 10 years from the publication, for scientific non-commercial use.

Types of analyses: Non-commercial.

Mechanisms of data availability: After approval of a proposal and with a signed data access agreement.
