S6 Table. Exponentiated regression coefficients estimating the association between experiencing parental/caregiver loss and parental separation before the age of 16 years and CMV, sTNF, IL-6, and CRP stratified by race/ethnicity. **Model 1** controls for age, gender, and parental education. **Model 2** controls for age, sex, parental education, and state of birth of the respondent. These models were carried out on the non-imputed study sample who were not missing data on state of birth.
