

Table 6. (Data not shown in text) Respondents' choice of study type by gender.

	Female	Male	Overall
Survey	78.7%	72.2%	341 (76.1%)
Focus Groups	37.5%	27.3%	150 (33.5%)
Clinical Trials	28.7%	25.6%	123 (27.5%)
Genetic Studies	37.5%	31.8%	158 (35.5%)
Total	272	176	448

* Percents do not add to 100 because more than one selection could be made.

Table 7. (Data not shown in text) Percentage of respondents willing to give sample, information or undergo testing or procedure for health related research studies

Sample	Percent willing to contribute
Blood	67%
Saliva	65%
Hair	70%
Urine/Feces	60.9%
Blood Pressure	70.7%
Height/Weight	70.3%
Memory Testing	51.8%
MRI Scan	28.8%
