Table 1. The CHEERS 2022 checklist.

Section/topic	Item No	Guidance for reporting	Reported in section
Title			Title page
Title	1	Identify the study as an economic evaluation and specify the interventions being compared.	
Abstract			Abstract in page 1
Abstract	2	Provide a structured summary that highlights context, key methods, results, and alternative analyses.	
Introduction			Introduction section
Background and objectives	3	Give the context for the study, the study question, and its practical relevance for decision making in policy or practice.	
Methods			M. (1. 1
Health economic analysis plan	4	Indicate whether a health economic analysis plan was developed and where available.	Method section 2.3
Study population	5	Describe characteristics of the study population (such as age range, demographics, socioeconomic, or clinical characteristics).	Method section 2.1
Setting and location	6	Provide relevant contextual information that may influence findings.	Method section 2.1
Comparators	7	Describe the interventions or strategies being compared and why chosen.	Method section 2.1
Perspective	8	State the perspective(s) adopted by the study and why chosen.	Method section 2.3
Time horizon	9	State the time horizon for the study and why appropriate.	Method section 2.3
Discount rate	10	Report the discount rate(s) and reason chosen.	Method section 2.3 (no
Selection of outcomes	11	Describe what outcomes were used as the measure(s) of benefit(s) and harm(s).	discounting, time horizon 14 days)
Measurement of outcomes	12	Describe how outcomes used to capture benefit(s) and harm(s) were measured.	Section 2.2
Valuation of outcomes	13	Describe the population and methods used to measure and value outcomes.	Section 2 <u>.2 and</u> Table 2
Measurement and valuation of resources and costs	14	Describe how costs were valued.	Section 2.2, Table 1 and 2
Currency, price date, and conversion	15	Report the dates of the estimated resource quantities and unit costs, plus the currency and year of conversion.	Section 2.3
Rationale and description of model	16	If modelling is used, describe in detail and why used. Report if the model is publicly available and where it can be accessed.	Used individual patient data, so
Analytics and assumptions	17	Describe any methods for analysing or statistically transforming data, any extrapolation methods, and approaches for validating any model used.	model is not used Section 2.2 and Supplementary
Characterizing heterogeneity	18	Describe any methods used for estimating how the results of the study vary for subgroups.	material method section
Characterizing distributional effects	19	Describe how impacts are distributed across different individuals or adjustments made to reflect priority populations.	Section 2.3
Characterizing uncertainty	20	Describe methods to characterise any sources of uncertainty in the analysis.	Section 2.3, used individual
Approach to engagement with patients and others affected by the study	21	Describe any approaches to engage patients or service recipients, the general public, communities, or stakeholders (such as clinicians or payers) in the design of the study.	patient data and bootst rap method Not applicable
Results			m 11 - 1 - 1
Study parameters	22	Report all analytic inputs (such as values, ranges, references) including uncertainty or distributional assumptions.	Table 1 and Table 2 and Su ppleme ntary material
Summary of main results	23	Report the mean values for the main categories of costs and outcomes of interest and summarise them in the most appropriate overall measure.	Section 3.1

6 VALUE IN HEALTH JANUARY 2022

Table 1. Continued

Section/topic	Item No	Guidance for reporting	Reported in section		
Effect of uncertainty	24	Describe how uncertainty about analytic judgments, inputs, or projections affect findings. Report the effect of choice of discount rate and time horizon, if applicable.	Section 3.2-3.5, Figure 1-5		
Effect of engagement with patients and others affected by the study	25	Report on any difference patient/service recipient, general public, community, or stakeholder involvement made to the approach or findings of the study	Not applicable		
Discussion					
Study findings, limitations, generalizability, and current knowledge	26	Report key findings, limitations, ethical or equity considerations not captured, and how these could affect patients, policy, or practice.	Section 4.2		
Other relevant information					
Source of funding	27	Describe how the study was funded and any role of the funder in the identification, design, conduct, and reporting of the analysis	Title page (unbind) ——— Title page (unbind)		
Conflicts of interest	28	Report authors conflicts of interest according to journal or International Committee of Medical Journal Editors requirements.
