

Supplementary Data 2

Supplementary Data Figure 2. Alzheimer pathology seen in Hematoxylin and Eosin staining in two donors with intermediate Alzheimer's disease neuropathological changes. In the Intermediate AD donor #16, the red arrows are pointing to amyloid plaque formation and the black arrow is pointing to a neurofibrillary tangle seen in the CA 2 region of the hippocampus (image A). The CA1 hippocampal region is shown in image B from intermediate AD donor #3. The black arrows are pointing to neurofibrillary tangles and the red arrow is pointing to a small plaque formation.
