

Supplemental Fig 3. Gel shift analysis of NOTCH3 recombinant protein expressed in multiple cell lines. Wildtype and CADASIL R90C mutant Fc-NOTCH3(1-3) protein was produced by transfection into 293, HeLa, and COS-7 cells. Conditioned media was analyzed on non-reducing gels, as described in Fig 1. The blue circles show wildtype (WT) protein and the red triangles indicate R90C mutant protein.
