

S3 Table. Medication use for gastrointestinal disease and antibiotic use within the formal and informal sector compared between the trial and control group.

Variable		Trial group n (column%)	Control group n (column%)	P-value for chi- square test
Illness episodes with gastrointestinal disease		327 (100%)	64 (100%)	
Formal sector		289 (88.4%)	44 (68.8%)	<0.001
Informal sector		38 (11.6%)	20 (31.3%)	
Illness episodes with formal sector drug use		1229 (100%)	312 (100%)	
Antibiotic usage	Yes	617 (50.2%)	249 (79.8%)	<0.001
	No	612 (49.8%)	63 (20.2%)	
Illness episodes with informal sector drug use		215 (100%)	171 (100%)	
Antibiotic usage	Yes	58 (27.0%)	116 (67.8%)	0.317
	No	157 (73.0%)	55 (32.2%)
