

Description of Additional Supplementary Files

Supplementary Data 1: PASC vs uncomplicated recovery feature importance list

Feature importance (potency) scores for all data features based on 10,000 RF classifications between PASC and CR patient groups (See methods).

Supplementary Data 2: Symptom distribution by PASC subtype classification

PASC symptom presentations between niPASC and inflPASC groups. Subgroup analyses including only patients more than 90 DPSO (middle), or with mild/moderate initial illness (right) are provided. Symptoms with 2x changes between groups are represented in bold.
