

A

Relapse-Free Survival
(Propensity score adjusted)

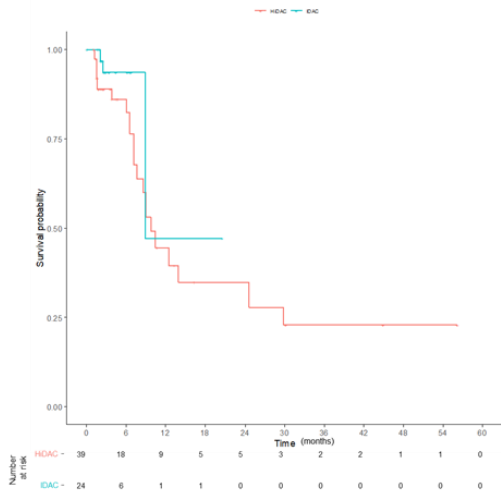

Overall Survival
(Propensity score adjusted)

B

Relapse-Free Survival
Censored for allogeneic SCT
(Propensity score adjusted)

Overall Survival
Censored for allogeneic SCT
(Propensity score adjusted)

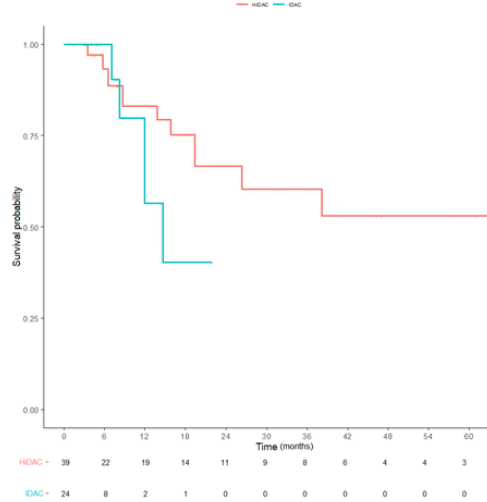

Figure S1. Kaplan-Meier estimates of relapse-free survival (RFS, left) and overall survival (OS, right) for ELN 2017 adverse risk AML patients after propensity score adjustment (A) and censored for allogeneic stem cell transplantation (SCT) in first complete remission (B).
