

All countries were categorized according to their "faster" or "slower" vaccination rates. The first category included countries that reached 60% of vaccinated residents by October 2021 and 70% by January 2022. The second or "slower" category included all other countries.

February 1, 2021

Share of people who completed the initial COVID-19 vaccination protocol, Feb 1, 2021

Total number of people who received all doses prescribed by the initial vaccination protocol, divided by the total population of the country.

1 %

Source: Official data collated by Our World in Data
 Note: Alternative definitions of a full vaccination, e.g. having been infected with SARS-CoV-2 and having 1 dose of a 2-dose protocol, are ignored to maximize comparability between countries.
