

**Molecular-enriched functional connectivity in the human
brain using multiband multi-echo simultaneous ASL/BOLD
fMRI**

Ottavia Dipasquale, Alexander Cohen, Daniel Martins, Fernando Zelaya, Federico Turkheimer, Mattia Veronese, Mitul Mehta, Steven CR Williams, Baolian Yang, Suchandrima Banerjee, Yang Wang

Supplementary material

Supplementary Figure 1 List of regions that reported significant within-group positive FC in the molecular-enriched functional maps derived from the BOLD and ASL datasets. For each functional network and dataset, the color scale indicates the probability of the regions to belong to that network.
