

Raw1

Raw data - 4 blots (bn1-4) with 3 biological replicates to examine steady-state levels of Shr3, shr3-35, shr3-50 and shr3-76. Blots were developed with polyclonal rabbit α -Shr3 (Kota and Ljungdahl, 2005) and with α -Pgk1. Quantitative data plotted in lower panel Fig. 1B

Fig. 1B

replicate 2 from bn1 and bn3 used to prepare Fig 1B
