# Supplementary Figure S7

Anti-PD-(L)1 and/or chemotherapy validation cohort
(covariate adjusted)

Supplementary Figure S7. Covariate adjusted Kaplan-Meier analysis of the anti-PD-(L)1 and/or chemotherapy (chemo) validation cohort

A. As in **Figure 4B**, except the Kaplan-Meier visualization of the anti-PD-(L)1 and/or chemotherapy (chemo) validation cohort **(**n=1,229 treatment lines) in each Immunotherapy Response Score (IRS) group was performed using covariate adjustment. **B**. As in **A**, except showing the non-small cell lung cancer (NSCLC) subgroup. Forest plot of hazard ratios is shown as in **Figure 4B**. **C**. As in **A**, except showing the other four tumor type (Other; triple negative breast cancer, esophagogastric, head and neck cancer, and small cell lung cancer) subgroups.
