Beta-cell function after Roux-en-Y gastric bypass or reduced energy intake alone in people with obesity

Bettina Mittendorfer, Bruce W. Patterson, Faidon Magkos, Mihoko Yoshino, David P. Bradley, J. Christopher Eagon, Samuel Klein

Supplemental Figure 1. Relationship between plasma C-peptide concentration and plasma glucose concentration before and during the first 30 minutes after ingesting 75 grams of glucose before and after progressive 6%, 11%, and 16% weight loss induced by a low-calorie diet. *Abbreviations:* OB, obese; PWL, progressive weight loss. Data are expressed as mean \pm SEM; n = 9.
