

Supplementary Figure S9

Supplementary Figure S9. BCR-free and metastasis-free survival differences in high vs low Total TILs scores. Kaplan Meier product-limit survival curves plotted for (A-B) BCR-free and (C-D) metastasis-free survival at log-rank $p > 0.05$ for high vs low Total TILs score cutoffs by (A and C) median and (B and D) Youden index.
