

Defining anti-synthetase syndrome: a systematic literature review

Supplementary online only material

Table S1. PICOs? developed to drive the literature review.

| Research Question | <i>Q1: How has ASSD been defined in the available literature?</i> | <i>Q2: What is the accuracy of the different definitions for diagnosing ASSD?</i> |
|---|--|--|
| Population | People with suspected ASSD (adults) Patients with confirmed ASSD (adults) | People with suspected ASSD (adults) Patients with confirmed ASSD (adults) |
| Interventions | Definition of ASSD by clinical, laboratory, imaging, instrumental testing, and histology features (alone or combined) | Definition of ASSD by clinical, laboratory, imaging, instrumental testing, and histology features (alone or combined) |
| Comparators (if applicable – not required for inclusion) | Other definitions of ASSD | Diagnosis of ASSD by expert opinion |
| Outcomes | N/A | Sensitivity Specificity Positive and negative predictive values Positive and negative likelihood ratios Diagnostic Odds Ratio |
| Study type | Systematic literature reviews, meta-analyses, RCTs, controlled trials, non-controlled trials, diagnostic accuracy studies, cohort studies, cross-sectional studies, and case-control studies | Systematic literature reviews, meta-analyses, RCTs, controlled trials, non-controlled trials, diagnostic accuracy studies, cohort studies, cross-sectional studies, and case-control studies |

ASSD: anti-synthetase syndrome; RCT: randomized clinical trial; N/A: not applicable.

Table S3. Muscle biopsy variables retrieved by the SLR and number of studies including them

| | N studies using variable for definition (Q1) | N studies using assessing variable performance (Q2) | Total (n= 11) |
|--|---|--|------------------|
| NECROSIS/REGENERATION | | | |
| Perifascicular necrosis | 2 | 3 | 5 |
| Diffuse necrosis | 3 | 2 | 5 |
| perimysial necrosis/regeneration | 0 | 1 | 1 |
| perivascular necrosis/regeneration | 0 | 1 | 1 |
| perifascicular mitochondrial disfunction | 0 | 1 | 1 |
| INFLAMMATION | | | |
| perimysial inflammation | 1 | 3 | 4 |
| perivascular inflammation | 0 | 2 | 2 |
| endomysial inflammation | 1 | 3 | 4 |
| ATROPHY/FRAGMENTATION | | | |
| perimysial fragmentation | 0 | 4 | 4 |
| perifascicular atrophy | 0 | 6 | 6 |
| diffuse atrophy | 0 | 1 | 1 |
| MHC/C5B-9 EXPRESSION | | | |
| MHC I diffuse expression | 1 | 3 | 4 |
| MHC I perifascicular expression | 0 | 1 | 1 |
| MHC II diffuse expression | 0 | 1 | 1 |
| C5b-9 diffuse expression | 1 | 2 | 3 |
| C5b-9 perifascicular expression | 0 | 2 | 2 |
| OTHER FINDINGS | | | |
| microinfarcts | 0 | 1 | 1 |
| ischemic myosinolysis* | 0 | 1 | 1 |
| actin filament inclusion | 0 | 1 | 1 |
| mitochondrial disfunction | 0 | 3 | 3 |
| MxA sarcoplasmic expression | 0 | 1 | 1 |
| RIG-1 expression | 0 | 1 | 1 |

* defined as punched-out vacuoles or myofibrillar rarefaction areas, corresponding to foci of myosin filament proteolysis.

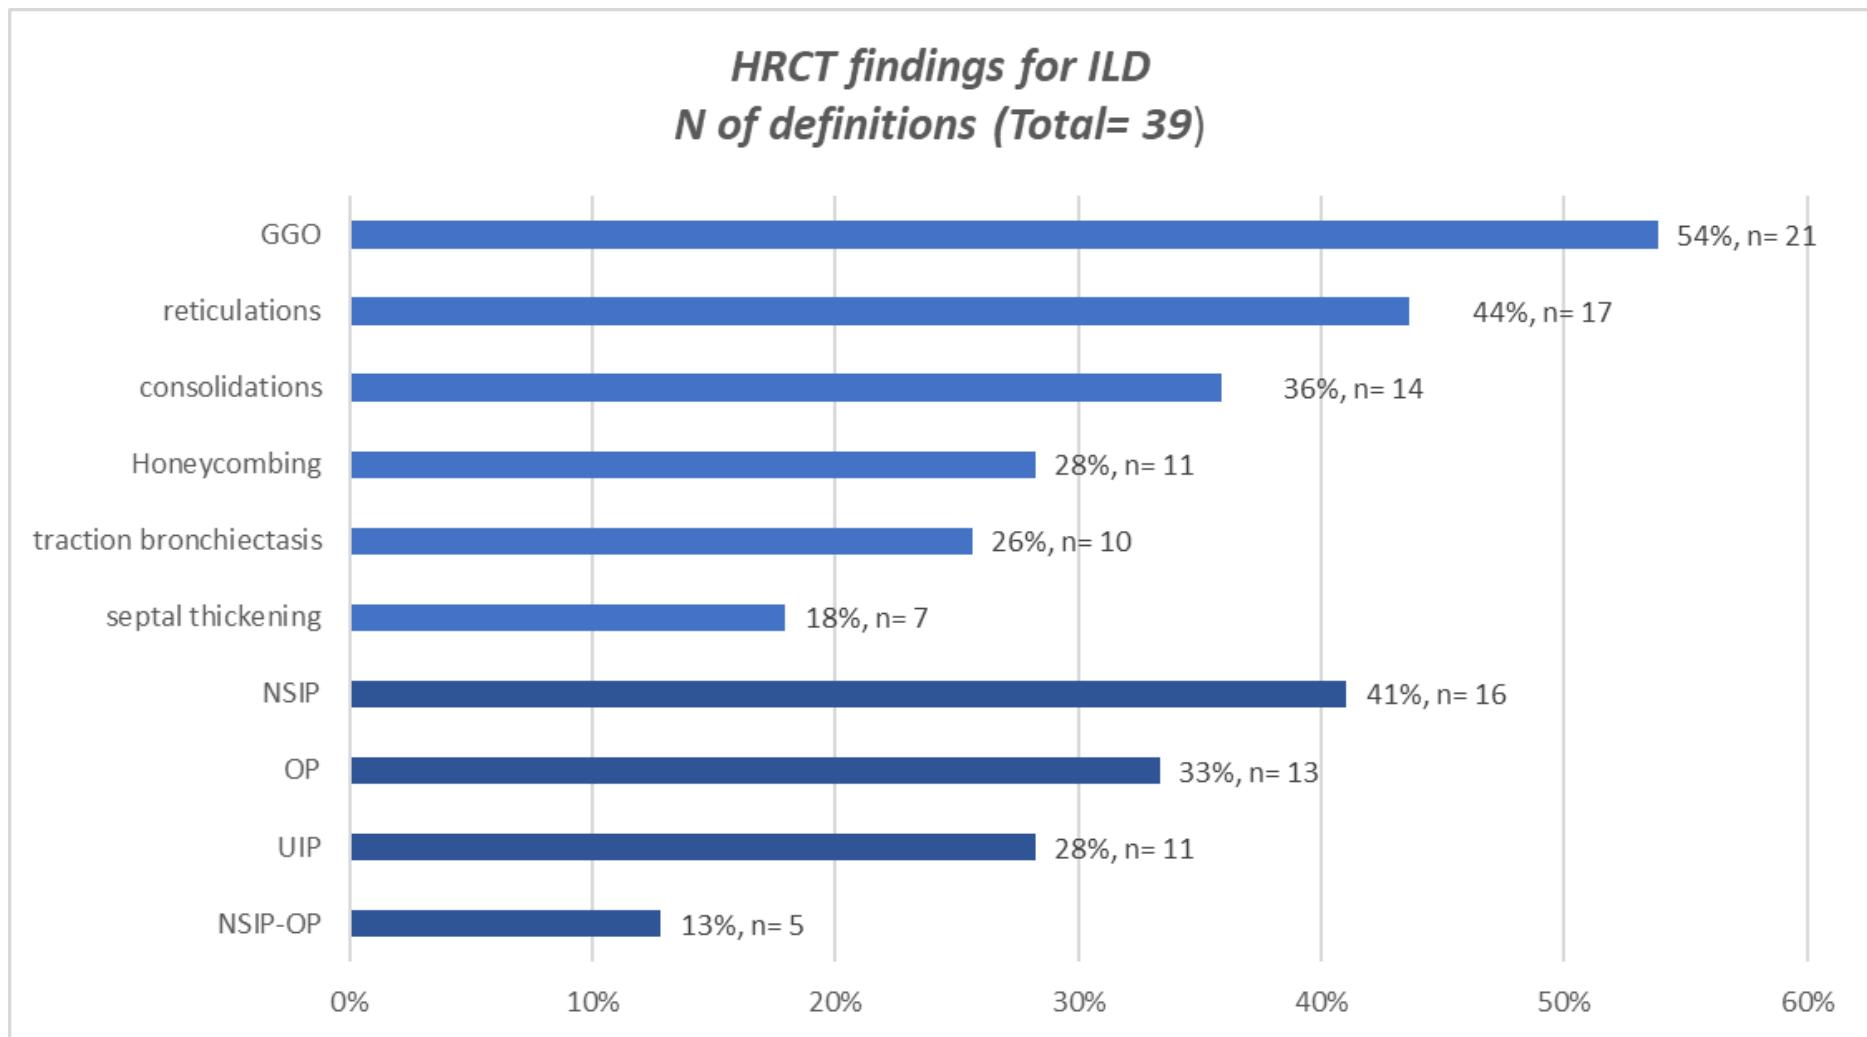

Figure S1. Histogram of HRCT findings used in ASSD definition

Table S4. Summary of findings – Q1 How has ASSD been defined in the available literature?

RoB: risk of bias; DM: dermatomyositis; PM: polymyositis; GGO: ground glass opacification; NSIP: nonspecific interstitial pneumonia; OP: organizing pneumonia; ILD: interstitial lung disease; HRCT: high resolution computed tomography; PFT: pulmonary function test; ARS: aminoacyl tRNA synthetase; ATS: American thoracic society; UIP: usual interstitial pneumonia; LIP: lymphocytic interstitial pneumonia; CK: creatinine kinase; RP: Raynaud's phenomenon; MH: mechanic's hands; EMG: electromyography; MRI: magnetic resonance imaging.

*The Risk of Bias was evaluated by the Newcastle-Ottawa Scale for cohort studies or case-control studies, according to study design. S: Selection items; C: comparability items; O: Outcome items. The symbol “**” indicates the score for each component of the scale. §: risk of bias assessed by QUADAS-2.*
