

# Supplementary Figure 3

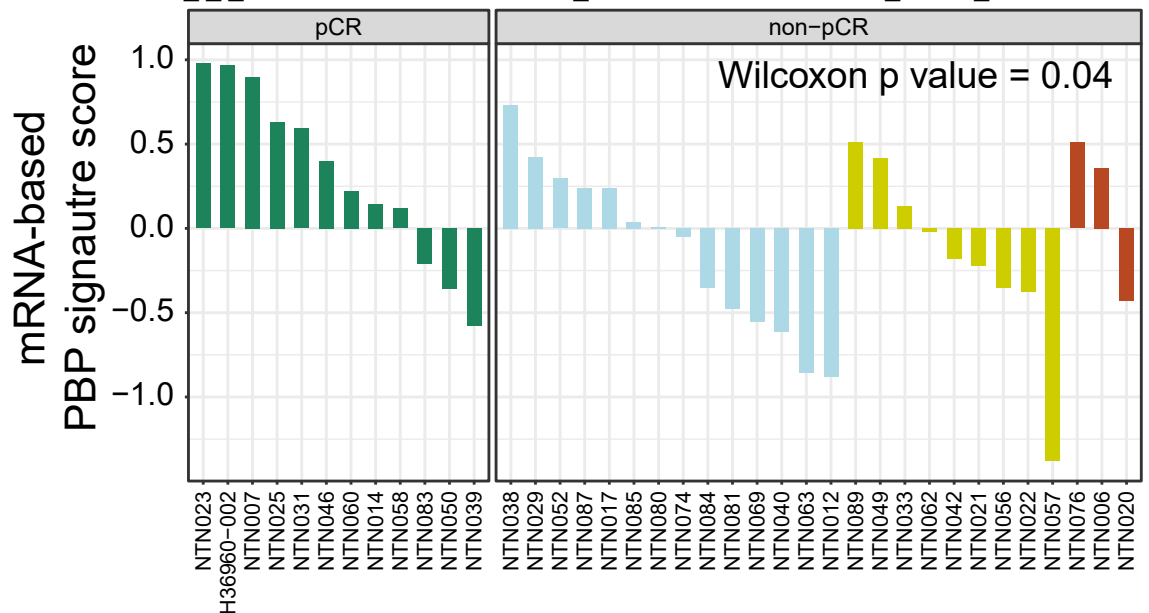

A

B

C

Supplementary Figure 3. Bar plot shows the levels of the PBP signature score in pCR samples (RCB 0) and non-pCR samples (RCB I/II/III) measured by the KIPA (A), the proteomics (B), and the RNA-seq (C). P-values were determined by the Wilcoxon rank-sum test comparing signature levels for pCR samples to non-pCR samples.
