

Table S1. Confirmation if identification by MALDI-TOF MS for strains initially identified complex *C. haemulonii* by API®ID32C (BioMerieux, Marcy l'Étoile, France) and stored at the University Hospital of Martinique.

Date of sampling	First correspondence	Second correspondence*	Type of sample
16/09/2014	<i>C. haemulonii sensu stricto</i>	<i>C. haemulonii var. vulnera</i>	Respiratory
14/10/2014	<i>C. duobushaemulonii</i>	-	Nail
26/12/2014	<i>C. duobushaemulonii</i>	-	Nail
24/02/2015	<i>C. duobushaemulonii</i>	-	Nail
25/02/2015	<i>C. duobushaemulonii</i>	-	Skin
24/07/2015	<i>C. haemulonii var. vulnera</i>	<i>C. haemulonii sensu stricto</i>	Contact lens
11/06/2015	<i>C. haemulonii sensu stricto</i>	<i>C. haemulonii var. vulnera</i>	Pus
24/06/2015	<i>C. haemulonii sensu stricto</i>	<i>C. haemulonii var. vulnera</i>	Nail
03/07/2015	<i>C. haemulonii sensu stricto</i>	<i>C. haemulonii var. vulnera</i>	Contact lens

*Specified if MS score >1.70
