

## Description of Additional Supplementary Files

File Name: Supplementary Data 1

Description: FigS9b\_input\_replica1: The input coordinate file for the MD simulation replica 1 on the rotation of peptide terminal amino group in the A pocket of FA20..8mer.

FigS9b\_output\_replica1: The final output coordinate file for the MD simulation replica 1 on the rotation of peptide terminal amino group in the A pocket of FA20..8mer.

FigS9c\_input\_replica1: The input coordinate file for the MD simulation replica 1 on the rotation of peptide terminal amino group in the A pocket of FV20..8mer.

FigS9c\_output\_replica1: The final output coordinate file for the MD simulation replica 1 on the rotation of peptide terminal amino group in the A pocket of FV20..8mer.

FigS10a\_input\_replica2: The input coordinate file for the MD simulation replica 2 on the rotation of peptide terminal amino group in the A pocket of non-disulfide bonded FA20..8mer. FigS10a\_output\_replica2: The final output coordinate file for the MD simulation replica 2 on the rotation of peptide terminal amino group in the A pocket of non-disulfide bonded FA20..8mer. FigS10b\_input\_replica2: The input coordinate file for the MD simulation replica 2 on the rotation of peptide terminal amino group in the A pocket of non-disulfide bonded FV20..8mer. FigS10b\_output\_replica2: The final output coordinate file for the MD simulation replica 2 on the rotation of peptide terminal amino group in the A pocket of non-disulfide bonded FV20..8mer.

File Name: Supplementary Data 2

Description: minim: The parameter file for the energy minimization stage in MD simulations on all the systems. nvt: The parameter file for the NVT thermal equilibration stage in MD

simulations on all the systems. npt: The parameter file for the NPT thermal equilibration stage in MD simulations on all the systems. md: The parameter file for the production run in MD simulations on all the systems.
