

Supplemental Tables.

Genomic response to sepsis in the lungs and kidneys as illustrated by the heat map of the top 100 genes displaying the greatest gene expression fold change. ST1 A & B. Genes with increased and decreased expression in both organs (Shared Genes) sorted by the fold expression in the lungs. **ST2 A & B.** Top genes expressed in the lungs. **ST3 A & B.** Top genes expressed in the kidneys. The data in both conditions CM (CM + Saline) and NTCl (CM + cSN50.1) is presented as a fold expression compared to Sham + Saline.
