

Supplementary Table 1. Correct Classification Rate for Each Subtype in the External Validation Set

Target subtype	Non-conversion model	Radiomics-based model	<i>p</i> value
HR+/HER2-	1.000 (1.000–1.000)	1.000 (1.000–1.000)	>0.999
HR+/HER2+	0.333 (0.000–0.711)	0.500 (0.100–0.900)	0.273
HR-/HER2+	0.529 (0.292–0.767)	0.882 (0.729–1.000)	0.002
Triple negative	1.000 (1.000–1.000)	1.000 (1.000–1.000)	>0.999

HR, hormone receptor; HER2, human epidermal growth factor receptor 2. Parentheses indicate 95% confidence intervals.
