### **International Advisory Committee on Clinical Trials in MS**

The International Advisory Committee on Clinical Trials in MS is a global body sponsored by the European Committee for Treatments and Research in MS and the National Multiple Sclerosis Society (USA). The Committee has been in existence for over 30 years and is composed of experts in clinical trials and clinical research in MS. The current membership of the committee can be accessed in the supplementary material. The committee is charged by the sponsoring organizations with providing perspective and guidance to the scientific and clinical community related to planning and implementation of clinical trials of MS therapies and allied topics. The Lublin-Reingold clinical course descriptors were originally developed by the committee in 1996 and subsequently revised in 2013.
