

Figure S2. Live-virus neutralization titers against MERS-CoV. Each dot represents an animal (RBD-Wu/RBD-Wu/RBD-Wu (black), RBD-Wu/RBD-Wu/RBD- β (blue) and HexaPro/HexaPro/RBD- β groups (red)). Day 21 and 120-160 represent peak and durability time points after the third immunization. The dotted horizontal line indicates limit of detection.
