1	The article is still lacking the cohesion between results a and discussion and as indicated by one the reviewer regarding the ethical issue those needs to be resolved . I encourage its resubmission as major revisions.	We are puzzled by the comments made by the editor, as the reviewer has clearly stated that all comments have been addressed and the quality of the manuscript has been significantly improved. We are unable to make any further changes to the manuscript unless the editor can provide specific details on how the manuscript "is still lacking the cohesion between results and discussion" and what exactly is the "ethical issue that needs to be resolved". Thank you.
