

Dear Editor,

Thanks for your revision. We have collected all authors' replies and combined all of the co-authors' email responses in this document.

Following the authors' replies, we all agreed that added Drs Baoyang Hu, Zhaoqian Teng, and Changmei Liu as co-authors in our revised manuscript for their help in the molecular experiment and manuscript revision.

Thanks for your consideration and we look forward to hearing from you soon.

Yours sincerely,

Jianwei Jiao

主题: Change the author list

Hi All,

How are you recently?

I am pleased to inform you that our manuscript CDD-22-2453RRR entitled "Brain-specific Pdl Deficiency Leads to Cortical Neurogenesis Defects and Depressive-like Behaviors in Mice" has been revised in Cell Death and Differentiation. Now we are ready to resubmit.

We added Drs Baoyang Hu, Zhaoqian Teng, and Changmei Liu as co-authors in our revised manuscript for their help in the molecular experiment and manuscript revision.

As required by the journal, we need to request agreement from all authors. Please reply to this email directly with Yes or No and with your name at your earliest convenience so that I can write back to Cell Death and Differentiation.

Hi All,

How are you recently?

I am pleased to inform you that our manuscript CDD-22-2453RRR entitled "Brain-specific Pdl Deficiency Leads to Cortical Neurogenesis Defects and Depressive-like Behaviors in Mice" has been revised in Cell Death and Differentiation. Now we are ready to resubmit.

We added Drs Baoyang Hu, Zhaoqian Teng, and Changmei Liu as co-authors in our revised manuscript for their help in the molecular experiment and manuscript revision.

As required by the journal, we need to request agreement from all authors. Please reply to this email directly with Yes or No and with your name at your earliest convenience so that I can write back to Cell Death and Differentiation.

Thanks again for your help during the study and revision.

All the best,
