

A

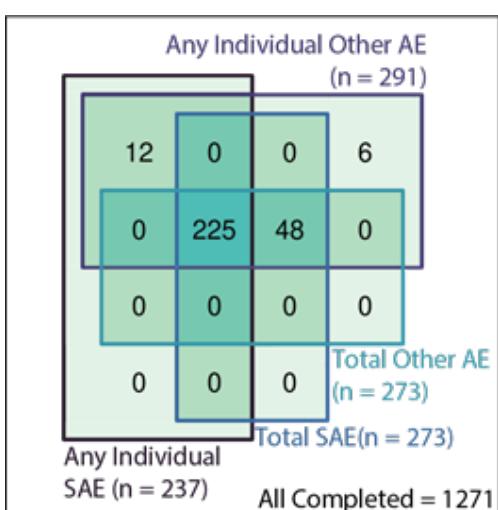

B

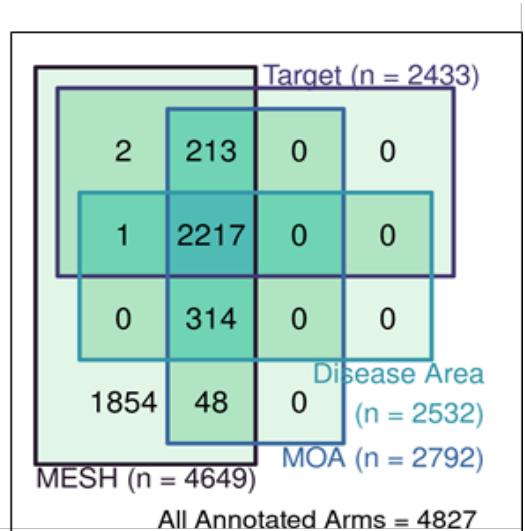

C

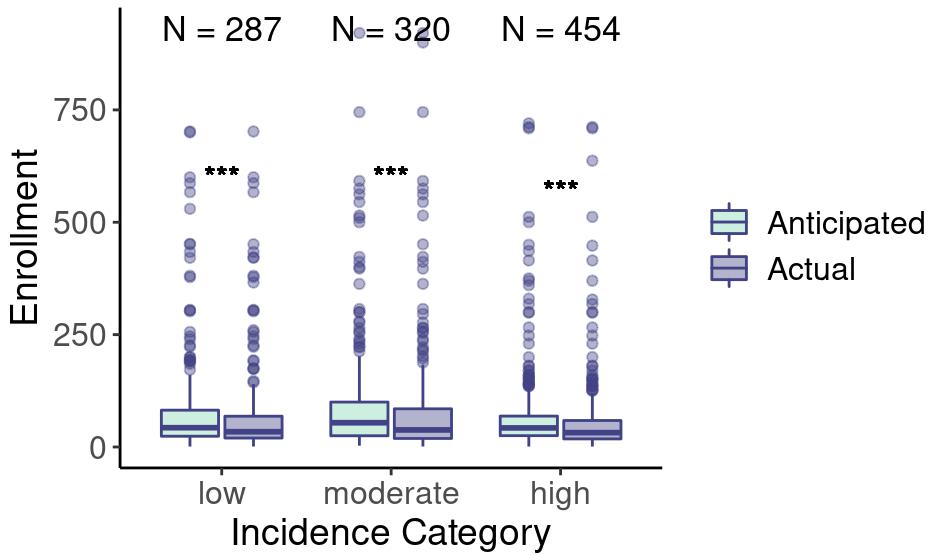

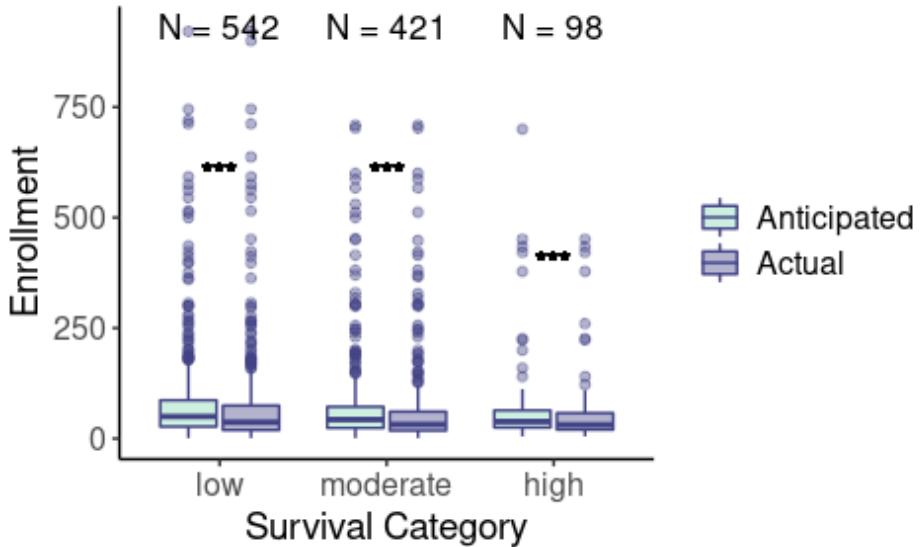

D

E

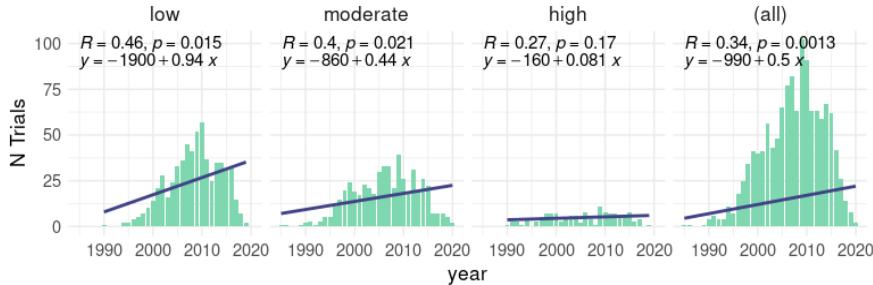

**Supplementary Figure S1.** Venn diagrams depicting data availability for (A) Main design elements, planned enrollment, publication reporting, and results reporting; (B) Detailed enrollment; (C) Reported results by planned outcome (DCR=disease control rate, defined as ORR + stable disease rate); (D) Reported adverse event results; (E) Target, mechanism of action, and disease area of interventions. The outer square indicates the set of trials or arms that are pertinent to the question. Each individual square indicates the subset of the trials/arms with indicated data element availability. The intersection among the squares indicates the number of trials/arms that have information on each of the questions represented by the overlapping squares.

**Supplementary Figure S2.** Comparison of target enrollment with actual enrollment for completed trials by survival category and incidence categories of conditions studied using one-sided Wilcoxon tests. Significance levels for p-adj:  $0 < *** \leq 0.001 \leq ** \leq 0.01 \leq * \leq 0.05$ .

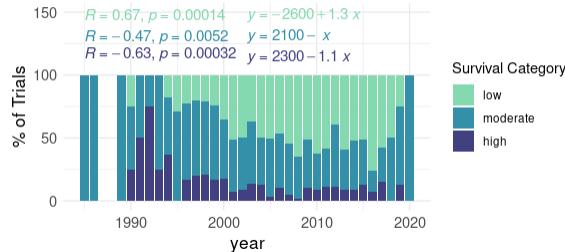

A

Number of trials in each survival category over time

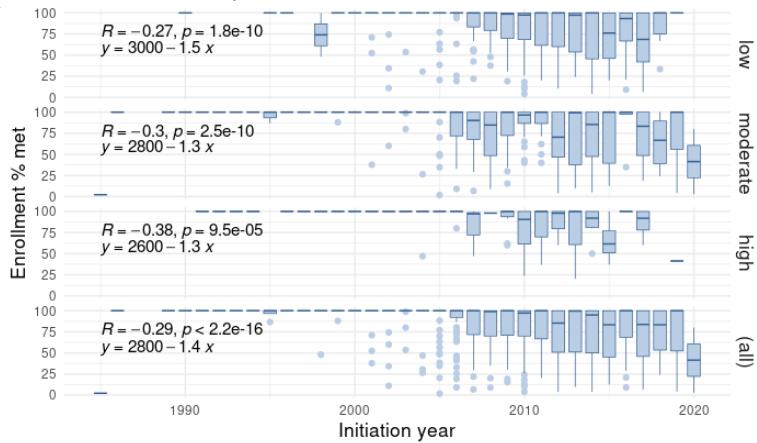

B

Survival of conditions studied by trials over time

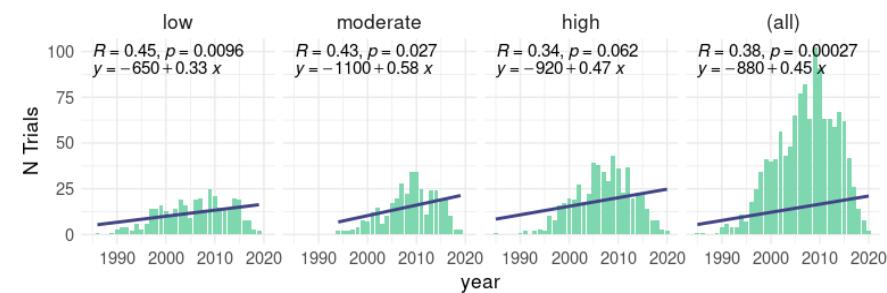

C

Enrollment Rates by Survival of Conditions Studied

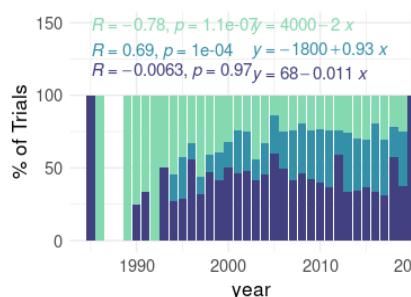

D

Number of trials in each incidence category over time

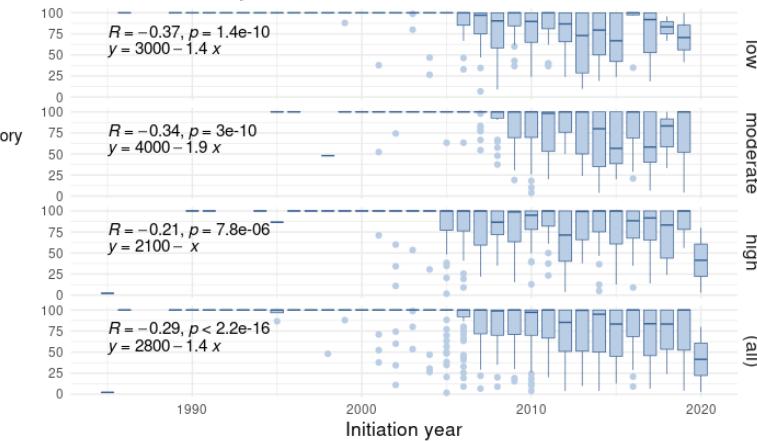

E

Total incidence of trials over time

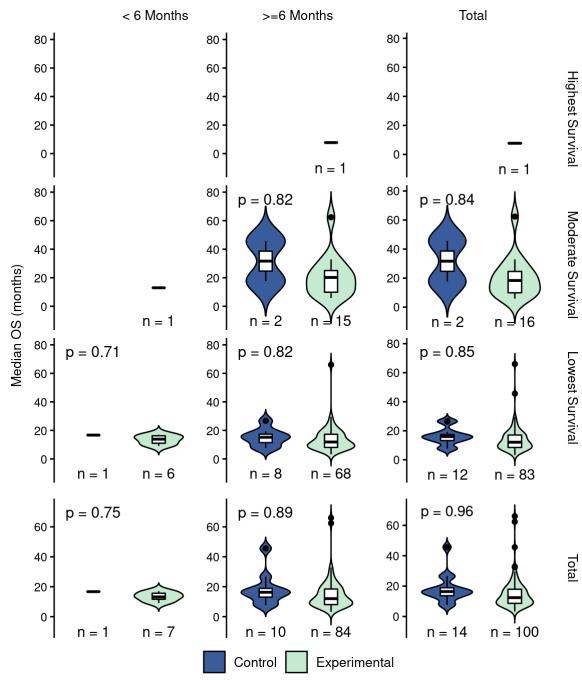

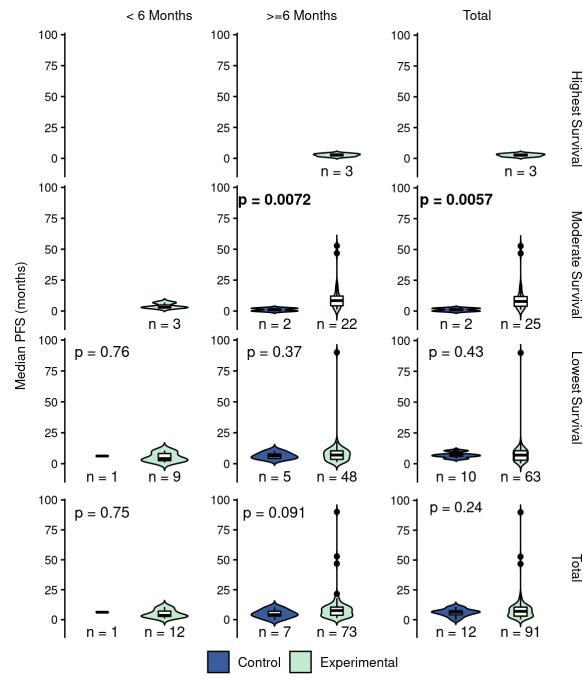

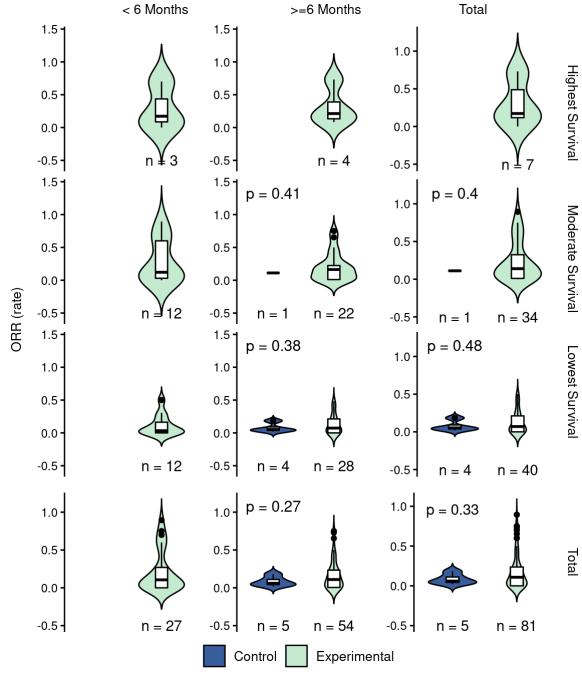

F

Enrollment Rates by Total Incidence of Conditions Studied

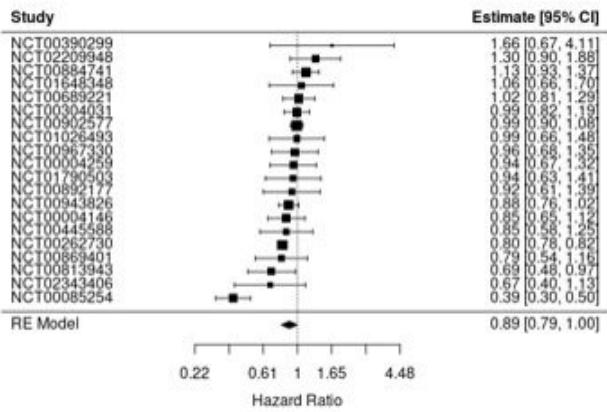

**Supplementary Figure S3.** Trial Enrollment and Accrual. Number and proportion of trials initiated each year, grouped by total incidence (A,B) and prognosis (D,E) of conditions studied. Percent of Enrollment goal met by trials each year, grouped by incidence (C) and prognosis (F) of condition studied.

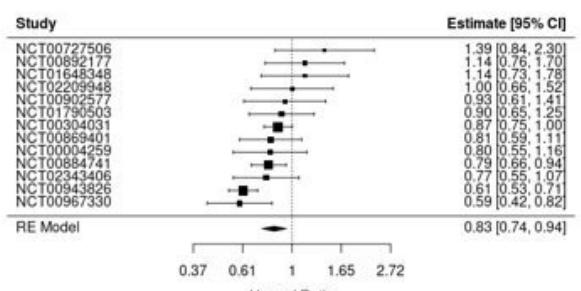

**A****B****C**

**Supplementary Figure S4.** Overview of reported efficacy and toxicity, stratified by survival category of condition and timeframe of outcome collection (>=6 or <6 months). Median responses were compared for experimental and control arms using Wilcoxon one sided test for trials reporting either or both experimental and control arm responses. Raw one-sided p-values are presented. Margin totals include trials missing annotations for timeframe and survival category. **A.** OS, **B.** PFS, **C.** ORR

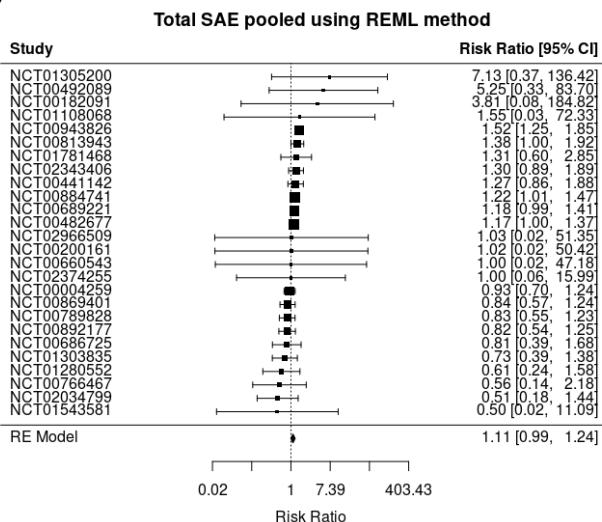

A

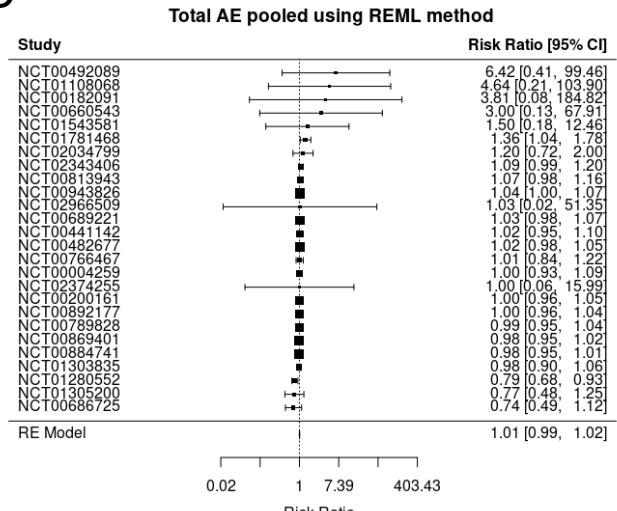

B

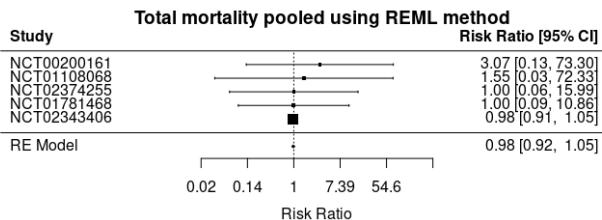

C

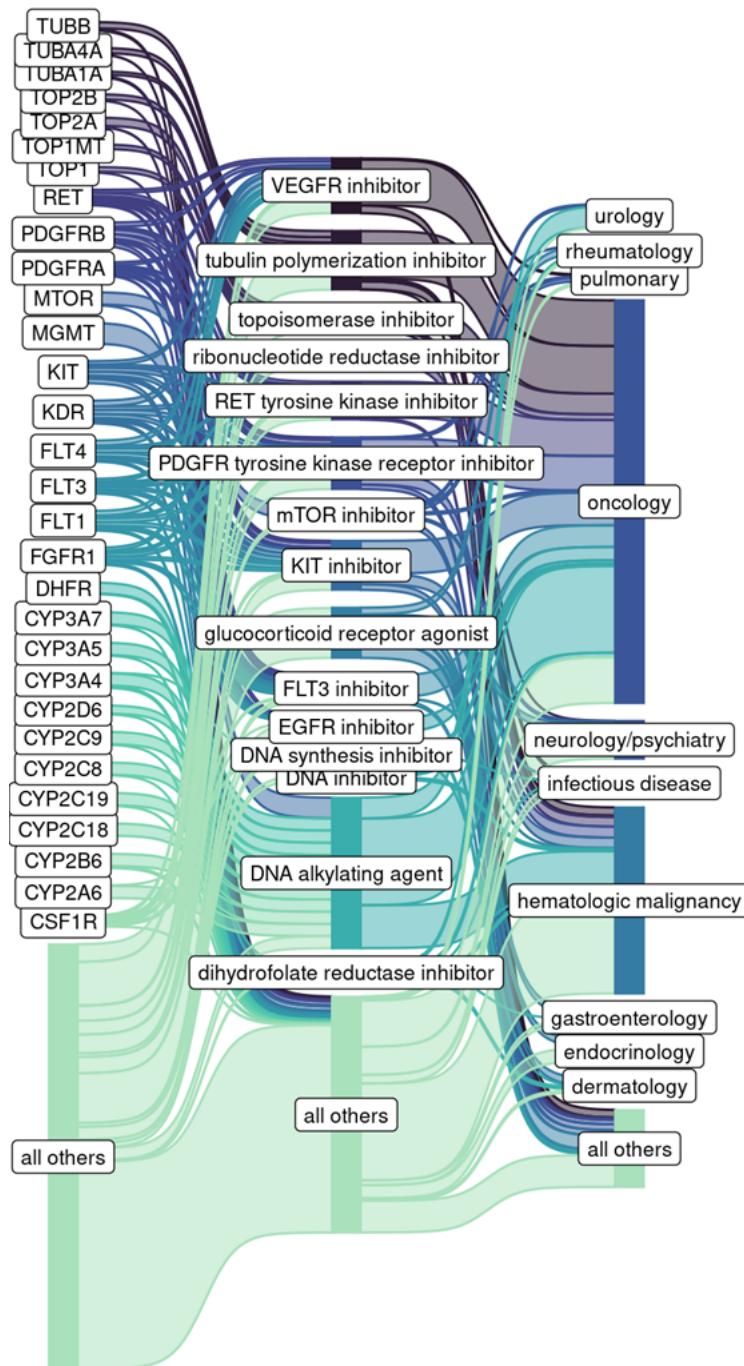

D

E

**Supplementary Figure S5.** Pooled Hazard Ratios and Intervention Toxicity Risk Ratios. **A.** OS and **B.** PFS outcomes from data reported by trials. **C.** Total Serious Adverse Events, **D.** Total Other Adverse Events, and **E.** Total All-Cause Mortality. Risk Ratios derived from studies reporting data for matched control and experimental arms.

| Target | Mechanism of Action | Disease Area |
|--------|---------------------|--------------|
|--------|---------------------|--------------|

**Supplementary Figure S6.** Most frequently studied interventions and their mechanisms of actions and disease areas obtained through annotations using the Drug Repurposing Hub database.

**Supplementary Table S1.** Search term derived from WHO classification of malignant CNS tumors to query neuro-oncology trials, by excluding non-malignant conditions as indicated by ICDO-O codes).

\*To exclude pediatric-targeted trials, we used the following parameter in our RPostgreSQL query:  
calculated\_values.maximum\_age\_num <= 18.

**Supplementary Table S2.** MeSH terms under “Neoplasm by Site”. These terms were used to search for general oncology trials in the clinicaltrials.gov registry.

**Neoplasms by Site [C04.588]**

- Abdominal Neoplasms [C04.588.033]
  - Peritoneal Neoplasms [C04.588.033.513]
  - Retroperitoneal Neoplasms [C04.588.033.731]
  - Sister Mary Joseph's Nodule [C04.588.033.740]
- Anal Gland Neoplasms [C04.588.083]
- Bone Neoplasms [C04.588.149]
  - Adamantinoma [C04.588.149.030]
  - Femoral Neoplasms [C04.588.149.276]
  - Skull Neoplasms [C04.588.149.721]
    - Jaw Neoplasms [C04.588.149.721.450]
      - Mandibular Neoplasms [C04.588.149.721.450.583]
      - Maxillary Neoplasms [C04.588.149.721.450.601]
      - Palatal Neoplasms [C04.588.149.721.450.692]
    - Nose Neoplasms [C04.588.149.721.600]
    - Orbital Neoplasms [C04.588.149.721.656]
    - Skull Base Neoplasms [C04.588.149.721.828]
  - Spinal Neoplasms [C04.588.149.828]
- Breast Neoplasms [C04.588.180]
  - Breast Carcinoma In Situ [C04.588.180.130]
  - Breast Neoplasms, Male [C04.588.180.260]
  - Carcinoma, Ductal, Breast [C04.588.180.390]
  - Carcinoma, Lobular [C04.588.180.437]
  - Hereditary Breast and Ovarian Cancer Syndrome [C04.588.180.483]
  - Inflammatory Breast Neoplasms [C04.588.180.576]
  - Triple Negative Breast Neoplasms [C04.588.180.788]
  - Unilateral Breast Neoplasms [C04.588.180.800]
- Digestive System Neoplasms [C04.588.274]
  - Biliary Tract Neoplasms [C04.588.274.120]
    - Bile Duct Neoplasms [C04.588.274.120.250]
      - Common Bile Duct Neoplasms [C04.588.274.120.250.250]
    - Gallbladder Neoplasms [C04.588.274.120.401]
  - Gastrointestinal Neoplasms [C04.588.274.476]
    - Esophageal Neoplasms [C04.588.274.476.205]
      - Esophageal Squamous Cell Carcinoma [C04.588.274.476.205.500]
    - Intestinal Neoplasms [C04.588.274.476.411]
      - Cecal Neoplasms [C04.588.274.476.411.184]
        - Appendiceal Neoplasms [C04.588.274.476.411.184.290]
    - Colorectal Neoplasms [C04.588.274.476.411.307]
      - Adenomatous Polyposis Coli  
[C04.588.274.476.411.307.089]
      - Gardner Syndrome  
[C04.588.274.476.411.307.089.393]

**Supplementary Table S7.** All outcomes of trials by phase and number of trial arm by design. All outcomes include primary, secondary, or other. Single arm trials were defined as studies reporting “number of arms” as one. Trials without number of arms, phase, or outcome type information were excluded.

**Supplementary Table S8.** Reporting of baseline patient counts by subgroup stratification. The registry provides space to report baseline patient counts by trial arm, stratification, or subgroups. To demonstrate availability of data that may of interest for downstream analyses, we assessed the proportion of trials reporting baseline counts by various patient subgroups among all interventional studies and among completed studies with sufficient information to curate trial arms (as described in methods) and any data on an efficacy outcome.

|  | <b>% of trials reporting baseline counts by subgroup</b> |  |
|--|--|--|
|  | <b>Completed studies<br/>(N=1271)</b>                    | <b>Completed studies with<br/>curated arms and efficacy<br/>data (N=168)</b> |
| Any baseline counts                            | 28.0% (n=356)  | 100% (n=168)   |
| <b>Subgroups</b>                               |  |  |
| Sex/gender                                     | 28.0% (n=356)  | 100% (n=168)   |
| Age groups                                     | 28.0% (n=356)  | 100% (n=168)   |
| Enrollment location                            | 16.5% (n=210)  | 53.6% (n=90)   |
| Race/ethnicity                                 | 13.6% (n=173)  | 44.6% (n=75)   |

\*from One-Sided Paired Wilcoxon Test

**Supplementary Table S11.** Association between the odds of trial meeting enrollment goal (logistic regression) and percent of enrollment goal met by trials (linear regression) with year, existence of US trial sites, and anticipated enrollment target.

|                        | <b>Logistic Regression</b>                |
|------------------------|---|
|                        | Odds of Trial Meeting Enrollment Goal (p) |
| Trial Year             | <b>0.85 (p&lt;0.00001)*</b>               |
| Has a US Trial Site    | <b>0.50 (p&lt;0.00001)</b>                |
| Anticipated Enrollment | 1.00 (p=0.357)                            |

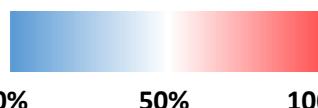

\*Bolded values indicate significance at  $\alpha = 0.05$

**Supplementary Table S12.** Size Effect Assumption Analysis. For completed trials reporting actual enrollment and primary endpoints of OS/PFS/ORR, the minimum effect size that the trial is sufficiently powered to assess was computed. For OS/PFS calculations as described in the methods, survival information was based on data for Glioblastoma (100%) for the low survival category; on Glioma (56.2%), Neuroectodermal Neoplasm (9.0%), Astrocytoma (7.7%), Meningioma (7.7%), CNS Lymphoma (7.2%), and others (<7%) for the moderate survival category, and on Germ Cell Neoplasm (46.6%), Pituitary Neoplasm (24.6%), Medulloblastoma (16.7%), Ependymoma (8.5%), Craniopharyngioma (5.6%) and others (<1%) for the high survival category.

| Survival Category | Phase           | OS                    |                  | PFS                   |               | Response Rate         |               |
|-------------------|-----------------|-----------------------|------------------|-----------------------|---------------|-----------------------|---------------|
|                   |                 | Minimum Detectable ES |                  | Minimum Detectable ES |               | Minimum Detectable ES |               |
