

Description of Additional Supplementary Files

File name: Supplementary Data 1

Description: Sequence data in fasta format used to explore the phylogenetic relationships between the *Batrachochytrium dendrobatidis* (Bd) isolates used in this study.

File name: Supplementary Data 2

Description: *Batrachochytrium dendrobatidis* (Bd) genotypes isolated from amphibians across Brazilian Atlantic Forest. This table includes isolate name or museum record of the host, host species, sampled host life-stage (tadpole or adult) and breeding habitat, collector name, isolation year, chytrid lineage or genotype, municipality, Brazilian state, latitude (Lat), longitude (Lon), and reference.
