

Organism	MIC mg/L			
	Omadacycline	Tigecycline	Amikacin	Clarithromycin
<i>M. perigrinum</i> ATCC 700686	0.25	0.06 (0.03-0.25) <sup>1</sup>	1 (≤1-4)	0.25 (≤0.06-0.5)
<i>M. abscessus</i> ATCC 19977	0.12	0.12	8	2
<i>M. abscessus</i> MMX 9450	0.5	0.25	8	2
<i>S. aureus</i> ATCC 29213	0.25 (0.12-1)	0.12 (0.03-0.25)	4 (1-4)	0.5 (0.12-0.5)

<sup>1</sup>CLSI acceptable QC value range shown in parentheses where available

**Supplemental Table 1. MIC values of test agent and comparators against *M. abscessus* and QC isolates.** MIC values were determined by broth microdilution following recommendations from CLSI. MIC values were used for determination of test concentrations during the intracellular time-kill assay.
