

Data Sharing Statement

Guterman. Care Ecosystem Collaborative Model and Health Care Costs in Medicare Beneficiaries With Dementia. *JAMA Intern Med.* Published September 18, 2023.
doi:10.1001/jamainternmed.2023.4764

Data

Data available: Yes

Data types: Deidentified participant data

How to access data: Deidentified participant data, including demographics, aggregated utilization, and caregiver outcomes, will be available via MedRIC. For information about the partnership between Care Ecosystem and MedRIC, visit <https://www.medic.info/partners-pages/ce>. For information on how to request Care Ecosystem data via MedRIC, visit <https://www.medic.info/request/data-request-new>. For Step 3 of the MedRIC partner data request process, contact Katherine.Possin@ucsf.edu

When available: With publication

Supporting Documents

Document types: None

Additional Information

Who can access the data: researchers whose proposed use of the data has been approved

Types of analyses: for any purpose

Mechanisms of data availability: with investigator support, after approval of a proposal, with a signed data access agreement
