

Supplementary Figure S2- E2 induces DNA damage in LTED and ER-overexpressing cells. In (A/B), cells were propagated in HD medium prior to seeding. In (C), T47D/pInd20-*ESR1* cells were pretreated with HD x 7 d, and then treated with HD + dox x 14 d prior to seeding. All cells were then treated as indicated x 24 h. Cells were fixed and stained for 53BP1 (green) and with DAPI (blue). Representative images are shown in (A). 53BP1 foci were counted in ≥ 100 cells per group. * $p < 0.05$, *** $p < 0.0005$, **** $p < 0.0001$.
