Bartlett L, Bindoff A, Doherty K, Kim S, Eccleston C, Kitsos A, Roccati E, Alty J, King AE, Vickers JC. ***An online, public health framework supporting behaviour change to reduce dementia risk: interim results from the Island Study Linking Ageing and Neurodegenerative Disease.***

Submitted BMC Public Health March 2023. Accepted 21 September, 2023.

Find the published paper at <https://doi.org/10.1186/s12889-023-16805-2>

Table S1. Number of risk behaviours by time and number of exposures to the Dementia Risk Profile report.

Months	Exposures	EMMEAN	SE
0	1	2.164	0.022
12	2	1.745	0.020
24	3	1.650	0.019
36	4	1.601	0.024

EMMEAN and SE: estimated marginal means and standard errors from unadjusted linear mixed effects regression testing effects of the number of exposures to the personal Dementia Risk Profile report. Note: exposures also provide a proxy for time in the project, as the report is provided after completing baseline and then each annual survey.

Table S2. Number of risk behaviours by exposures to the Dementia Risk Profile report, with and without engagement with the Preventing Dementia Massive Open Online Course

Months	Exposures	PDMOOC	EMMEAN	SE
0	1	No	2.196	0.031
12	2	No	1.800	0.028
24	3	No	1.730	0.028
36	4	No	1.704	0.035
0	1	Yes	2.132	0.029
12	2	Yes	1.689	0.026
24	3	Yes	1.571	0.025
36	4	Yes	1.498	0.030

EMMEAN and SE: estimated marginal means and standard errors from unadjusted linear mixed effects regression testing effects of the number of exposures to the personal Dementia Risk Profile report (PDMOOC= no) and the effects following engagement following the PDMOOC. Note: exposures also provide a proxy for time in the project, as the report is provided after completing baseline and then each annual survey.

Table S3. Probability of moving into a different level of risk (low, medium, high) for each domain of the Dementia Risk Profile, from baseline to 2022

Risk factor	Baseline risk level	2022 risk level	Probability of change	SE	95%CI		t ratio	p value
Alcohol consumption								
	low	low	0.828	0.082	0.661	0.994	10.063	< 0.001

Probability of Change: using multinomial logistic regression we estimated the probability of transition from risk state in baseline data (provided between October 2019 and June 2022) to risk state in October 2022; bold text denotes statistical significance with $\alpha=0.05$. Results are averaged over PDMOOC, age, sex, education and socioeconomic status.

Please refer to the ISLAND Protocol paper for scoring criteria. <http://dx.doi.org/10.2196/34688>

Table S4. Probability of moving into a different level of risk (low, medium, high) for each domain of the Dementia Risk Profile, by PDMOOC engagement

Risk behaviour	PDMOOC exposed	2022 risk level	Probability of change	95%CI		p value	Effect of PDMOOC
Alcohol consumption							
	Yes - No	high	-0.003	-0.026	0.019	0.776	0.3% fewer
	Yes - No	medium	0.000	-0.036	0.036	0.997	0.0% more
	Yes - No	low	0.010	-0.023	0.043	0.547	1.0% more
Blood pressure management							
	Yes - No	high	-0.003	-0.023	0.017	0.772	0.3% fewer
	Yes - No	medium	-0.004	-0.021	0.012	0.581	0.4% fewer
	Yes - No	low	0.008	-0.015	0.031	0.508	0.8% more
Body mass index							
	Yes - No	high	-0.019	-0.040	0.003	0.094	1.9% fewer
	Yes - No	medium	0.002	-0.030	0.035	0.879	0.2% more
	Yes - No	low	0.016	-0.016	0.048	0.323	1.6% more
Cholesterol management							
	Yes - No	high	-0.041	-0.085	0.003	0.065	4.1% fewer
	Yes - No	medium	0.015	-0.006	0.036	0.150	1.5% more
	Yes - No	low	0.026	-0.020	0.073	0.258	2.6% more
Cognitive activity							
	Yes - No	low	-0.002	-0.027	0.024	0.890	0.2% fewer
	Yes - No	high	0.002	-0.024	0.027	0.890	0.2% more
Diabetes management							
	Yes - No	high	-0.046	-0.085	-0.006	0.024	4.6% fewer
	Yes - No	medium	0.007	-0.010	0.024	0.441	0.7% more
	Yes - No	low	0.039	-0.003	0.082	0.066	3.9% more
Mediterranean diet adherence							
	Yes - No	high	-0.038	-0.084	0.008	0.104	3.8% fewer
	Yes - No	medium	-0.004	-0.043	0.034	0.815	0.4% fewer
	Yes - No	low	0.043	0.011	0.075	0.010	4.3% more
Physical activity							
	Yes - No	low	0.025	-0.007	0.056	0.111	2.5% more
	Yes - No	high	-0.025	-0.056	0.007	0.111	2.5% fewer
Smoking							
	Yes - No	high	0.043	-0.003	0.088	0.064	4.3% more
	Yes - No	medium	-0.047	-0.081	-0.013	0.008	4.7% fewer
	Yes - No	low	0.005	-0.047	0.057	0.856	0.5% more

Results from multinomial models are averaged over age, sex, educational attainment and area-based Index of Relative Socio-economic Advantage and Disadvantage. Probability of change contrast analysis: PDMOOC engaged vs not; bold text denotes statistical significance with $\alpha=0.05$. Please refer to the ISLAND Protocol paper for scoring criteria. <http://dx.doi.org/10.2196/34688>

Supplementary Table S5: Descriptive summary data by timepoint for measures of dementia risk knowledge and motivations to change dementia risk behaviours

Outcome variable	BL	Oct-20	Oct-21	Oct-22
Dementia risk literacy	n=3038	n=2010	n=2136	n=3001
General knowledge				
Mean (SD)	12.4 (4.05)	13.9 (4.13)	13.6 (4.20)	13.8 (4.15)
Median [Min, Max]	12.0 [1.00, 22.0]	13.0 [2.00, 22.0]	13.0 [0, 22.0]	13.0 [2.00, 22.0]
Correct attributions				
Mean (SD)	12.0 (5.14)	13.9 (4.63)	18.0 (5.96)	18.2 (6.18)
Median [Min, Max]	11.0 [0, 28.0]	13.0 [0, 20.0]	17.0 [0, 28.0]	18.0 [0, 28.0]
Misconceptions				
Mean (SD)	1.94 (2.37)	2.89 (2.81)	2.90 (2.82)	2.59 (2.74)
Median [Min, Max]	1.00 [0, 12.0]	2.00 [0, 12.0]	2.00 [0, 12.0]	2.00 [0, 12.0]
Motivations to change dementia risk behaviours	n=3038	n=1972	n=2125	n=2987
Susceptibility				
Mean (SD)	10.8 (2.74)	10.3 (2.74)	10.5 (2.77)	10.5 (2.81)
Median [Min, Max]	11.0 [4.00, 20.0]	10.0 [4.00, 20.0]	11.0 [4.00, 20.0]	11.0 [4.00, 20.0]
Severity				
Mean (SD)	15.5 (3.01)	15.1 (3.05)	15.2 (2.95)	15.3 (3.03)
Median [Min, Max]	15.0 [5.00, 25.0]	15.0 [5.00, 25.0]	15.0 [5.00, 25.0]	15.0 [5.00, 25.0]
Benefits				
Mean (SD)	15.0 (1.92)	15.2 (2.03)	15.2 (2.05)	15.2 (2.05)
Median [Min, Max]	15.0 [8.00, 20.0]	15.0 [5.00, 20.0]	15.0 [6.00, 20.0]	15.0 [4.00, 20.0]
Barriers				
Mean (SD)	8.21 (2.26)	8.31 (2.26)	8.43 (2.25)	8.59 (2.41)
Median [Min, Max]	8.00 [4.00, 20.0]	8.00 [4.00, 18.0]	8.00 [4.00, 17.0]	8.00 [4.00, 20.0]
Cues to action				
Mean (SD)	13.0 (2.38)	13.0 (2.44)	12.9 (2.39)	13.1 (2.43)
Median [Min, Max]	13.0 [4.00, 20.0]	13.0 [4.00, 20.0]	13.0 [4.00, 20.0]	13.0 [4.00, 20.0]
Health motivation				
Mean (SD)	15.4 (2.09)	15.3 (2.08)	15.2 (2.11)	15.3 (2.14)
Median [Min, Max]	15.0 [7.00, 20.0]	15.0 [8.00, 20.0]	15.0 [8.00, 20.0]	15.0 [6.00, 20.0]
Self-efficacy				
Mean (SD)	7.72 (1.17)	7.79 (1.19)	7.75 (1.19)	7.70 (1.22)
Median [Min, Max]	8.0 [3.0, 10.0]	8.0 [2.0, 10.0]	8.0 [2.0, 10.0]	8.0 [2.0, 10.0]

BL: baseline completed between Oct 2019 and June 2022; Oct-20: data from sample with BL prior to August 2020 and 2020 survey data; Oct-21: data from sample with BL prior to August 2021 and 2021 survey data; Oct-22: data from sample with BL prior to August 2022 and survey data in 2022. Dementia Risk Literacy measured using the Knowledge of Dementia Risk Reduction scale¹; Motivations to change dementia risk behaviours measured using the Motivations the Change Lifestyle and Behaviours for Dementia Risk Reduction scale²

Sample r code for linear regression models

Estimate direction and magnitude of associations between intervention exposures and outcome variables (sample code shows DRP change)

```
#unadjusted model (no mooc)

m0 <- lmer(DRP_total_all ~ exposures + log(t_months+1) + (1+exposures|UID), data = d)

#unadjusted model - effect of mooc

m1 <- lmer(DRP_total_all ~ exposures*mooc + log(t_months+1) + (1+exposures|UID), data = d)

# covariate adjusted model

m2 <- lmer(DRP_total_all ~ exposures*mooc +
           log(t_months+1) +
           age +
           gender +
           BACKGROUND_marital_cat +
           BACKGROUND_education_cat +
           IRSAD_Decile
           + (1+exposures|UID), data = d)
```

Sample r code for multinomial regression models

Estimate matrix of transition probabilities across risk levels in each DRP domain, with and without contrast for intervention exposures. (Sample shows code for alcohol tests.)

Packages: lmerTest3 lme4 and emmeans5

#Calculate the omnibus statistic for the change from BL to Oct22 (participation in ISLAND, including first exposure to DRP)
