

Figure S7. **Replication using alternative parcellations** | Analyses were repeated using (a) the 100-region Schaefer parcellation and (b) the 68-region Cammoun parcellation (regionally equivalent to the Desikan-Killiany atlas) [1–3]. We show each network as well as the the 5% (for Schaefer) or 10% (for Cammoun) strongest edges of the network. The data underlying this figure can be found at [https://github.com/netneurolab/hansen\\_many\\_networks](https://github.com/netneurolab/hansen_many_networks).
