Uveitis	<i>OHIP</i> : 364 <i>ICD-9</i> : 364.0 <i>ICD-10</i> : H20.0	<ul style="list-style-type: none"> • ≥5 physician claims including ≥1 by an ophthalmologist, or • ≥1 hospitalization with any of the specified ICD-9 or ICD-10 codes listed as reason for hospitalization or co-morbid condition (primary, secondary, or type 3 diagnosis) 	N/A (not validated)	Time from first diagnostic code to date of infection
Vasculitis	<i>OHIP</i> : 446, 447 <i>ICD-9</i> : 446.0, 446.2, 446.4, 446.5, 446.7 <i>ICD-10</i> : M30, M31.0, M31.3, M31.4, M31.5, M31.7	<ul style="list-style-type: none"> • ≥3 physician claims including ≥1 by a rheumatologist, or • ≥1 hospitalization with any of the specified ICD-9 or ICD-10 codes listed as reason for hospitalization or co-morbid condition (primary, secondary, or type 3 diagnosis) 	N/A (not validated)	Time from first diagnostic code to date of infection

^aOHIP codes are an abbreviated list of ICD-9 codes used for outpatient physician billing; ICD-9 codes are included hospital records prior to April 1, 2002; ICD-10 codes are used for hospital records beginning on April 1, 2002

^bAccuracy of algorithm in the validation cohort is reported in parentheses.

Abbreviations: EMR, electronic medical record; ICD, International Classification of Diseases; NPV, negative predictive value; OHIP, Ontario Health Insurance Plan; PPV, positive predictive value; Sens, sensitivity; Spec, specificity; y, years

eTable 2. International Classification of Diseases (ICD)-10 codes used to identify individuals developing a venous thromboembolism

Type of Venous Thromboembolism	ICD-10 Code	Description
Deep vein thrombosis	I82.2	Embolism and thrombosis of vena cava
	I82.3	Embolism and thrombosis of renal vein
	I82.8	Embolism and thrombosis of other specified veins
	I82.9	Embolism and thrombosis of unspecified vein
	O22.3	Deep phlebothrombosis in pregnancy
	O22.9	Venous complication in pregnancy, unspecified
	O87.1	Deep phlebothrombosis in the puerperium
Pulmonary embolism	I26.x	Pulmonary embolism
Portal vein thrombosis	I81	Portal vein thrombosis
Mesenteric thrombosis	K55.0	Acute vascular disorders of the intestine
Supraventricular vein thrombosis	G08.x	Intracranial and intraspinal phlebitis and thrombophlebitis
	I67.6	Non-pyogenic thrombosis of intracranial venous system

Abbreviations: ICD, International Classification of Diseases

eTable 3. International Classification of Disease (ICD)-10 codes for immune-mediated inflammatory diseases that were excluded from the adapted version of the Charlson Comorbidity Index used in this study

Type of IMID	ICD-10 Codes Excluded
Rheumatoid arthritis	M05, M06
Systemic autoimmune rheumatic disease	M32, M33, M34, M35.0, M35.1, M35.3
Polymyalgia rheumatica	M35.3
Vasculitis	M31.5

Abbreviations: ICD, International Classification of Diseases; IMID, immune-mediated inflammatory diseases

eTable 4. Previously validated algorithms used to identify individuals with selected comorbidities

Comorbidity	Diagnostic Codes ^a	Algorithm	Accuracy
Chronic obstructive pulmonary disease (7)	<p><i>OHIP</i>: 491, 492, 496</p> <p><i>ICD-9</i>: 491, 492, 496</p> <p><i>ICD-10</i>: J41, J42, J43, J44</p>	<p>≥35 years of age and</p> <ul style="list-style-type: none"> • ≥1 hospitalization or encounter in the CIHI Same Day Surgery database, or • ≥3 physician claims within 2 years 	<ul style="list-style-type: none"> • Sens: 57.5% • Spec: 95.4% • PPV: 81.3% • NPV: 86.7%
